

CLARK COUNTY

RFP #888

DESIGN SERVICES for 2025 PRESERVATION ADA IMPROVEMENTS

QUESTIONS and ANSWERS

UPDATED: MARCH 27, 2024

	QUESTION	ANSWER
1.	After reviewing the project limits, it appears the only signalized intersection that falls within your vicinity maps in the RFP is at NE 73rd St & the WA-500. Being that the WA-500 is a state route, we were wondering if the County intends to address the ADA ramps at that corner? Are the NE and SE corners of that intersection part of your planned ADA ramp improvements?	It is not currently known if that is the only signalized intersection included in this project. The ADA ramps included in the project that located at the corner of SR500 will need to be addressed, along with the receiving ramps. Coordination with WSDOT may be required.
2.	What is the estimated value/budget?	The contract amount for services will be determined during the contract negotiation process. PE phase funding is included in the ongoing sidewalk program budget. The budget for the construction phase is \$1,800,000.00. Both are included in the 2024-2029 Transportation Improvement Program.
3.
