Non-Partisan	Position should focus on local concerns & business. Not national interests.	Non-Partisan		Increase number of districts to five	Population would be better represented	Keep it at 10 years		Yes	Yes	Yes	Not all humans are altruistic. Greed can be very tempting. Also a written code will help define what is or is not ethical.		Non of the above. Diversity committee just creates the illusion of doing something. Just hire and/or promote equally.
Non-Partisan	I'd prefer non-partisan - but the reality is it's pretty easy to tell by the conduct and behavior which party they favor.	Non-Partisan	Same concern as before. Taking away the labels won't necessarily change anything. The candidate will still lean towards behavior typical of the party they support.	Increase number of districts to five	I feel the chair should be chosen each year from the council. Council members should be prohibited from serving consecutive terms as chair. They could serve again as chair for a future term.	Change it to 5 years	Ten years is too long considering the growth our county is facing.	Yes	Yes	Yes	To hold council members in check and provide a mechanism for removal or reprimand. Eileen Quiring is exactly the reason this is necessary! Her behavior is atrocious and unethical.	Both a position or office and an advisory board or commission.	Clark County needs to reflect current times.
Non-Partisan		Non-Partisan		Increase number of districts to five		Change it to 5 years		No	No	No		Creation of an advisory board or commission.	
Non-Partisan	I would like you ask this question of the voters. If I remember right, the Clark County Refiew Comsion discussed giving the voters three or four choices for this question. For example, ask the voters a question about partnership and non-partnership: 1. Elect Clark County Council as partisan and Clark County elected positions as partisan. 2. Elect Clark County Council as partisan and Clark County elected positions as non-partisan. 3. Elect Clark County Council as non-partisan and Clark County elected positions as partisan. 4. Elect Clark County Council as non-partisan and Clark County elected positions as non-partisan. This gives more say on how they want their Clark County Council and elected leaders for each department versus yes or no questions. ——— I do not care for elected partisan positions because the parties are too often involved and nothing gets accomplished (for example, Washington, DC). I'm very frustrated with polictal parties including the getting permision to vote a certain way, a political agenda for the party not the voters, etc. Clark County would be better off without political parties. Finally, my	Non-Partisan	Again, give the voters a say... For example, ask the voters a question about partnership and non-partnership: 1. Elect Clark County Council as partisan and Clark County elected positions as partisan. 2. Elect Clark County Council as partisan and Clark County elected positions as non-partisan. 3. Elect Clark County Council as non-partisan and Clark County elected positions as partisan. 4. Elect Clark County Council as non-partisan and Clark County elected positions as non-partisan. This gives more say on how they want their Clark County Council and elected leaders for each department versus yes or no questions. These types of questions give the people the power to decide and more say on what type of government they want!	Increase number of districts to five	Clark County needs more than four districts. I do not think five is enough for our population. I prefer 6 districts and three a large: West Vancouver, East Vancouver, Hazel Dell/Felida/Salmon Creek, Ridgefield/La Center, Camas/Washougal, and Battle Ground/Yacolt. This allows for better representation .	Change it to 5 years	10 years is too long. Five is more appropriate to make change as we go instead of proposes too many questions on the ballot every 10 years.	Yes	Yes	Yes	I support some sort of ethnics for councilors.	Both a position or office and an advisory board or commission.	I would like to learn more about proposals. Thank you.
Partisan	I struggle with this because I wish political party affiliation didn't matter so much, but it does. Even more so in the last few years, I'm afraid. If every single candidate running for County Council honestly and clearly explained their positions on key issues on their campaign websites and Voter's Pamphlet statement, it might not be necessary. But the quality (and truthfulness) of that information is not reliable. Some candidates don't offer any information about their positions on issues at all!	Non-Partisan	These positions are elected to do very specific jobs with a high degree of competency. Their work history/experience matters WAY more than their political party.	Increase number of districts to five	Our county is growing and becoming more diverse. I think a larger number of councilors representing smaller districts would be better representative of their constituents in specific areas. It would be easier to get out and talk to constituents, go to community events, etc. if the districts were smaller, as well.	Change it to 5 years	Things change very quickly in five years. It's best to keep up.	Yes	Yes	No	The fact that there isn't already an ethics code surprised me. We definitely need one! An independent ethics commission charged with reviewing complaints would also be helpful, especially if they were also given the authority to issue "punishments" or direct council to do so. I'm not sure an ethics oversight and compliance office would be necessary unless there are a lot of complaints to review and county staff resources are needed to larger extent.	A position or office within Clark County government that drives, advises and coordinates Department of Equity & Inclusion efforts.	I think hiring someone to lead this effort is enough at this point, but only if that person is given a high level of authority and support. Later, if they feel it would be helpful, an advisory commission or board could be formed.

Partisan	The Republican & Democratic monopolies enjoy blanket control. Exclusion from representation, barriers to party loyalty, and dismissing those social levels only offers the voter less participation. Party politics and platforms are crucial, so that should be reflected in the Councilor positions for our county. Thank you for your consideration.	Partisan	More information is better than less. The voter has a stake in the partisan part in addition to their elective choice for the positions. Removal of party from the ballot only obfuscates the political picture. I appreciate your time.	Keep four districts	The most southern county in the state should keep it flagship simple. The trade off for the representative voice of a newly enclaved 5th district will only cool off their collective chances of the general voter. Please do not reduce the size of District 49. Perhaps you agree?	Keep it at 10 years	10 years raises the importance. The charter must be held high. These are critical decisions. 5 years alone invites aloofness from Mr. & Mrs. John Q. Voter. God bless your attention to these surveys and good luck. The charter should include that we pray for our county. Please support the East Minnehaha neighborhood remaining unincorporated. Fireworks should be made legal again, it is a tradition, and traditions are to be passed on. Thank you kindly.	No	No	No	As a Roman Catholic, virtues are virtues, and unfortunately, experientially, ethicists have even less ability than the Holy Church to convince the gen. pop. to be good, in recent terms, not historically. In a time when values have replaced the virtues, it is doubtful an Ethics Code would be written which may not promote that which is actually unethical. I think it is an invitation for dispute. I would refer ultimately to the Priest. Did you know it that is has been reported that faith in institutions is down, yet more revealing is that that is bothering the people who lost the faith less and less? I pray for them, for that is a poverty.		Why not have an Office of Accountability? I wrote before in general that trust is the one of the least fosterable things, it occurs organically. Inclusion. For example my Ethnicity is Roman Catholic. Many don't realize that ethnicity may well be your ethno-religious kinship of association. Disestablishmentarianism would be welcomed, yet that is particular to the Catholic Clark County majority-minority I assume (non-supermajority). Equity. Fairness. Fairness is best as universal because agreement about what is needed is never singular when all are concerned. Diversity - I'm Irish, so please close the city operations on Good Friday & St. Patrick's Day.

Partisan	It's important to have a political understanding of a candidate for public office that will be influencing the decisions made for the county.	Partisan	Decisions made by Elected officials in public office are heavily influenced by their political party of choice. As a member of this community. Voters deserve to know what candidates candidates political affiliation to make an informed decision.	Keep four districts		Keep it at 10 years		No	No	No	Too much oversight hinders efficiency. Our elected officials don't need an ethics board or ethics oversight, as voters were responsible to vet and make decisions about who we are voting into office.		None of these are needed
Non-Partisan	The important issues the County Council faces are non-political, and the voters would be best served by having more centrist members of the Board.	Non-Partisan	Non-partisan races might draw a more diverse group of candidates and elect people intent on serving the interests of all,	Increase number of districts to five	An additional district would better ensure that local interests are identified and addressed. An appointed chair would help ensure that someone with a political agenda does not attain that influential chair position.	Change it to 5 years	A lot can happen in 5 years. The Council and public should be continuing to look for ways to improve how the Council functions.	Yes	Yes	Yes		Both a position or office and an advisory board or commission.	Having a dedicated advocate provides better focus and attention, and an advisory board would help bring diverse concerns and recommendations forward.
Partisan	A candidate can be partisan regardless of what the ballot says or doesn't say. If a candidate is affiliated with a political party, voters should be aware of it.	Partisan	Same.		There is not enough information presented here to decide. How many people are in each district? Population should dictate the number of districts.	Change it to 5 years	There's no harm in reevaluating a course more often.	Yes	Yes	Yes		Creation of an advisory board or commission.	Not sure what all of the implications are here, but a board of many voices seems preferable to a single position.

Partisan	Displaying partisan information assists the voter as to how the candidate is most likely to vote/represent the voters.	Partisan	Displaying partisan information assists the voter as to how the candidate is most likely to vote/represent the voters.	Increase number of districts to five		Change it to 5 years	Reducing the timeline to five years will act to keep the Commission in touch with their area needs.			Yes		A position or office within Clark County government that drives, advises and coordinates Department of Equity & Inclusion efforts.	
Partisan	The party affiliation and biases will usually be there, so this will help voters know where candidates are coming from on the issues.	Non-Partisan	These are administrative positions where the focus should be on the candidates' experience and qualifications. Further, and because not asked for in this survey, the Sheriff needs to have some of his discretionary power to decide what to enforce taken away. Recent responses to the COVID "rules" showed too many placed politics above law enforcement.	Keep four districts	I'm not sure it really matters, but I'd rather have the chair position elected instead of appointed by a vote of the Council. We (the voters) might as well be responsible for putting stupid people in the leadership role.	Keep it at 10 years		Yes	Yes	Yes	These are all a qualified Yes. There's often a political bias applied to what's considered ethical.	Creation of an advisory board or commission.	An advisory board would be more likely to focus on real issues and to bring in divergent viewpoints. A hired position is too dependent on the whims of whoever they work for. (Speaking from military EO experience.)

Non-Partisan	Simply listing a political party is not a substitute for a candidate's actual values; not only are many of us here in Clark County are increasingly disillusioned with both Democrats and Republicans, but I believe that doing away with listed party affiliation may help push voters to learn more about and do deeper research into given candidates (rather than automatically picking the (D) or (R) appearing on the ballot).	Partisan	Strangely enough (considering my previous answer), I do believe that county offices outside of the council should remain partisan positions. A friend of mine pointed out that voters are simply unlikely under any circumstances to have the chance to do much research into these kinds of less-prominent, more mundane positions. After thinking about it, I agree with that assessment; having the shorthand of (D) or (R) might actually be more beneficial than not in this case.		Good or bad, I don't know what practical effects increasing the number of districts would have on how well our county is represented... therefore I find I cannot in good conscience answer this question either way.	Change it to 5 years	I believe it should be changed to five years precisely for the reasons the Charter Review Commission is considering: "to accommodate for the current and expected growth and changes happening in Clark County." The charter should be adaptable to meet Clark County's needs as it moves into the future; a decade is simply too long between reviews, and having five years instead makes good sense.	Yes	Yes	Yes	Ethics are extremely important, and oversight needs to be distinct from the local governance in question.	Both a position or office and an advisory board or commission.	Where diversity, equity, and inclusion are concerned, Clark County needs to do everything it possibly can as soon as it can. It's extremely clear to everyone paying attention that our county has deep problems with systemic racism, and having both these things would go a fair ways toward restoring public trust.
Partisan	I want to see what the party is putting out there.	Partisan	They way things are in today's climate I want to see the party of who I vote for. To many people of one party are defying their oath and I will only know not to vote for them if I can see the party. they represent.	Increase number of districts to five		Change it to 5 years		Yes	Yes	Yes	I believe it's always good practice to have oversight and accountability so corruption doesn't take hold.	Both a position or office and an advisory board or commission.	Sadly in 2021 we still need an oversight for Equity and inclusion. Because we haven't done the right thing for all these years I want both positions so we have a proper checks and balances on this issue.
Non-Partisan	Most issues facing counties are not partisan. There are policy elements, but all residents generally want the potholes to be fixed, law enforcement to serve and protect, and not to have their enjoyment of their homes ruined by having a chemical factory upwind.	Non-Partisan	See comments above.	Increase number of districts to five	I believe that electing the person to chair meetings and speak for the Council is best because council members are likely to choose someone for their interpersonal and communication skills. Someone can be an effective campaigner and win over voters with a partisan appeal, and not have the skill set for being an effective chair.	Keep it at 10 years	Five years for a new charter is not sufficient time to see how the Charter performs under different County Councils and County Managers. Are the issues that come up due to the Charter language or due to the personalities of the people carrying out the terms of the Charter? Give the process more time to unfold between reviews so the Charter Review Commission can make this judgment. Also, changing the Charter so often makes it different for the Council and Manager to work out issues administratively.	Yes	Yes	Yes	Having the Council police itself is unwise and may lead to Council members making ethics claims and decisions for political gain or due to personality conflicts. Having a separate structure that enables members of the public to file complaints would better enhance confidence. In addition, having a county Ethics Code allows the county to set more stringent standards than are set by state law.	Both a position or office and an advisory board or commission.	An advisory board without a dedicated position/office to actually push for change would be toothless.
Non-Partisan	Non partisan will be less likely to base their votes to go along with party politics. Have had enough of that.	Non-Partisan	Non Partisan will be more likely to vote with their constituents in mind instead of a party agenda.	Increase number of districts to five	An even number leaves the possibility of a tie. Both sides deadlocked. An odd number will break that up and eliminate that possibility. Waste less time	Change it to 5 years	It should be every 2 years. Change is good. The same people voting the same way for 10 years is ridiculous	Yes	Yes	Yes	Keeps the commission in check	Creation of an advisory board or commission.	Getting tired of this getting driven down our throats. The last thing we have time and resources for is another Govt office to triple check that which is already being checked and double checked
Non-Partisan	Maybe they will get more done if they can avoid party bickering.	Partisan	It helps voters decide what the candidates value.	Keep four districts	The fewer the politicians the better	Keep it at 10 years		No	No	No			None of the above! Stop wasting tax payer money with divisive left-wing propaganda.
Non-Partisan	I think counselors should be chosen based on what they believe in or how they've behaved as a counselor in the past rather than having a dependent on party they are registered with.	Non-Partisan	Same reasons as the previous question.		I'm not sure about this one. If district for is consistently represented by one party, then dividing district 4 would give two votes to that entire area. That seems unbalanced.	Change it to 5 years	The world is changing to rapidly to make 10 years the review. Making it five years would give a greater chance of keeping up with changes.				I would want more information about the way these things are handled currently before making any kind of a choice about this. I think the idea is good but the question is will it become just more bureaucracy? OOPS... This answer belongs with the next questions.

Partisan lines hinder real progress- creating unnecessary biases and hurdles to productive conversation	Increase number of districts to five		Change it to 5 years	I think that a lot can change in a community in 5 years time, let alone 10! Yes	Yes	Yes	Especially for organizations like our animal control agency- agencies that interact with multiple, sensitive facets of our community and have dual purpose	Both a position or office and an advisory board or commission.	I think both are needed in Clark County- historically there has not been any consistent oversight in this area! An advisory Board is important to keep the ever-changing community need and opinion in the fore front of the conversation and an office is important for accountability, adherence and buy in.
Non-Partisan	I'm sick of partisan politics. Just calling it non-partisan won't make it so, but it should take the "in your face" part of it out.	Non-Partisan	Vote for the person who is most qualified not the person who identifies with your political party. Take the partisan out of politics and maybe we'll avoid electing complete nut jobs..	Increase number of districts to five	I can't recall if the Chair votes. An even number can lead to tie votes. More councilors decreases the chance of a couple of nut jobs hijacking the council. Chair should definitely be appointed, not elected.	Change it to 5 years	Change is happening very fast. How we'll look in five years will be very different from now and 5 years after that still more change.	Yes	Yes	No	Code yes. Commission that is available to act independently yes. A whole office for oversight and Compliance, no. We have better things to do with our money that fund more bureaucracy. Make the commission step one and see how that goes.		We have a commission for Equity and Inclusion. This is a poorly worded question. There is a fourth choice which is continue what we are doing now. Unless the decision has already been made to do one of the two I say let it stand. If the county feels they need ANOTHER board or commission then I'd rather not see a position or office.

Non-Partisan	Voters would have to actually read the statements of each candidate, instead of just seeing the R or D.	Non-Partisan		Increase number of districts to five	It's ridiculous to east county lumped in with Battle Ground and the north county. Voters in these areas have very divergent views!	Change it to 5 years	As 2020 has shown us, incredible changes can occur in a short period of time. What has stayed the same as it was in 2011? Socially, economically, and politically, we are a vastly different culture in 2021. Even libraries "weed" books after 4-5 years on hundreds of topics (especially books on computers, business, and travel) because within 5 years much of the information is outdated.	Yes	Yes	No	The last 5 years has been a catastrophe of federal ethics. Our culture is redefining what our ethics are as a country and people. We need to define our local views on ethics and have an independent commission when issues arise. However, an oversight committee can become more of a problem than a solution if members are selfish and are corrupt themselves.	Creation of an advisory board or commission.	
Non-Partisan		Non-Partisan		Keep four districts		Keep it at 10 years		Yes	Yes	Yes		Creation of an advisory board or commission.	
Partisan	I think it is important to know the ideology of the candidate I'm voting for. Both Democrats and Republicans have an agenda I want to know the agenda the candidate stands for before I cast my vote.	Non-Partisan	I don't think that these positions make political decisions, therefore I don't need to know their political affiliation.	Increase number of districts to five	I'm not sure about this answer but Vancouver is growing so it would make sense to add a district.	Change it to 5 years	A lot can happen in 10 years, but as we've just seen, a whole lot can happen in just one year. I think it would be wise to shorten the review period five years.	No	No	No	I do not think that we have a lack of ethics as a society. I do think that there are people that choose not to follow a code of ethics. I don't think we need to spend time coming up with a set of ethics and then reviewing and enforcing these ethics. I think instead we need to focus on encouraging people to be good people in general, but not have it bound up in bureaucratic red tape and tax payer money.		Neither. I don't think this is something that tax payer money should be spent on. There are plenty of non-profit and other organizations that are already tackling this and that's where I think it should stay. With the people, not government.
Non-Partisan	The parties have divided us. Many people have values on both sides of the aisle. As an example, I know many who may have some conservative social values but highly value the environment.	Non-Partisan	We can't bring people together if we keep talking parties. And more and more people are independents now than ever because they are sick of partisan politics.	Increase number of districts to five	Five can break a tie. Plus the smaller districts will more accurately reflect the local people that they represent. I.e., downtown Vancouver residents may have different priorities than Yacolt residents.	Change it to 5 years	Clark county has experienced rapid growth and an evaluation of those impacts and adjustments to future growth should happen sooner than later.	Yes	No	No	I do believe that there needs to be an ethics code. Not sure if more layers of government is the way to enforce the codes, so a bit unsure as to how best accomplish review of ethics violations.	A position or office within Clark County government that drives, advises and coordinates Department of Equity & Inclusion efforts.	Less government is better. Some of these issues have ballooned into much more than needed and only slows things (decisions) down.
Partisan	There should not be non-partisan labeling other than judges. That creates a falsehood since the vast majority, as opposed to a rare minority of party members, move in near-to-full lockstep with their voting party on almost every one of their decisions. Adding members who are allowed to not identify with their historical behavior, is a hidden agenda	Partisan	Only judges should be non-partisan	Keep four districts	You did not inform me as to why the commission is considering a 5th district so I cannot agree with that development. Don't hide reasons if you truly care about this survey and what will be done with the answers	Change it to 5 years	Absolutely change to 5 years. Look at the development going on every month, it is astounding the over-development and with far too long a review in terms of what developers should be responsible for	Yes	Yes	Yes	How could this even be a question? When did our government agencies feel it was not within their purview to be ethical to citizens?	Both a position or office and an advisory board or commission.	And let me be clear, that by creating a position and advisory board, that these positions and boards, be subject to an outside ethics committee in order to be a citizen guardian from an organization whose purpose is to care for the citizenry, not from any business or lobbying interest

Non-Partisan	I would like to take the definition of a person based on their political party out of the consideration for county elected offices.	Non-Partisan	It is not the party but the person that I vote for for an office. Too much baggage is associated with a party designation. Individuals do not always accept all that a party is defined by.	Increase number of districts to five	More districts means more local representation to the residents. A rotating chair gives balance to the council with each district having a turn to lead the agenda and organization. We are growing and more councilors means more opportunity for the residents to have a voice.	Change it to 5 years	The times they are a changing to quote a song. In a rapidly altering landscape, government needs to keep up. Just look at what the pandemic did to the community.	Yes	Yes	Yes	Trust in government has been week and falling as new revelation about immoral, unethical, and corrupt activities are revealed. We need a watchdog with teeth.	Both a position or office and an advisory board or commission.	The population does not realize the diversity of our community. People are often existing in a cocoon within their job, neighborhood, and social group and the makeup of our area is rapidly changing.

Non-Partisan	Without political parties displayed voters are more likely to vote based on qualifications and the views of candidates then along party lines. Also candidates not belonging to the two major parties are more likely to be considered.	Non-Partisan	Same as above, removing party affiliation brings more attention to the actual candidate then the political party.	Increase number of districts to five	While keeping the four is fine too, more smaller districts give citizens more representation on the needs their smaller district. That's a problem it should be someone's actual job to fix, not just something we all wring our hands about and hope gets better.
Non-Partisan	Partisanship sows division. We should focus on our common goals as a community rather than divisive labels.	Non-Partisan	Partisanship in these positions can give the appearance of favoritism. These positions should represent all citizens equally regardless of partisan affiliation.	Increase number of districts to five	Increasing the number of districts would give all citizens better representation	Change it to 5 years	We are in a period of rapid growth and change. Charter review periods should be more frequent to reflect this.	Yes	Yes	Yes	Every governmental agency should have safeguards in place to establish and enforce ethical standards of conduct	Both a position or office and an advisory board or commission.	We need to be proactive in improving this for our community. We should do everything we can feasibly do to promote diversity, equity, and inclusion.
Non-Partisan	Pot holes, jail cells, public health, zoning issues should be non partisan. There are no Democratic or Republican pot holes. Why some offices are political never made sense to me...assessor, sheriff etc.	Non-Partisan	These are all bread and butter local issue oriented jobs. I want the best person not the best politician.	Increase number of districts to five	Would make councilors more accountable to a smaller number of constituents. I would want to hire a non-partisan group to draw fair boundary lines based on population and commonality of local interests, rather than drawing lines to favor one political party or the other.	Keep it at 10 years	I like the long view to give better perspective.	Yes	Yes	Yes	Gee, imagine if all our councilors were held accountable in this area. In the past we have had some real losers. This would be a nice check on bad behavior.	A position or office within Clark County government that drives, advises and coordinates Department of Equity & Inclusion efforts.	In my 27 years in Clark County I have seen a steady shift towards diversity. Let's not cram this down anyone's throat but let's make sure we recognize differences and do not unintentionally discriminate. It has pissed me off for years that citizens of CC who are Sikhs, Buddhists, Hindus, Atheists have to watch their (sic) council sit under a Judeo-Christian motto. Talk about feeling excluded.

Partisan	There is currently a great deal of division among the parties and our community. It can help with transparency.	Partisan		Keep four districts		Change it to 5 years		Yes	Yes	Yes	There have already been incidents of ethical misconduct by council members that should be reviewed by an independent group. The council members must have more oversight and be held accountable.	Both a position or office and an advisory board or commission.	Clark county has a great deal of work to do to overcome issues related to equity and diversity. Our current council is out of touch. This work needs to be made a priority.
Non-Partisan	We are witnessing the downside of partisanship during the pandemic in the Board of Public Health meetings. There is simply no justification for politicization of science in a public body responsible for the health of the community it serves. Mask wearing, vaccination, lock-down precautions should not be opportunities for dog whistles to voting blocs.	Non-Partisan	I can see both sides of this. I wouldn't want this to detract though from remedying the current situation that exists with the County Councilors comprising the entire county Board of Health. That's where the emphasis on change should be.	Increase number of districts to five	I believe it is consistent with the rapid growth of the county that is predicted to continue .	Change it to 5 years	I think the Charter Commission can play an essential role adapting to changes that are not predictable now, but may warrant voter input sooner than 10 years in the future.	Yes	Yes	Yes	I think this is the best way to actually promote trust in local governance.	Both a position or office and an advisory board or commission. Non-Partisan	They are chosen to represent the broad view of the county. This is a very diverse county with many different views. Partisan	Although I am not entirely sure, it seems since we are so sadly parted on party lines and most folks speak in such general terms, it may be helpful to know what their orientation is. More useful would be to ask questions that they must answer that go to undergirding values.	Partisan	For the same reasons stated above.	Increase number of districts to five	I don't feel as informed as I'd like on this. But Clark County is growing fast and it makes sense to respond in kind, by increasing the representation.	Change it to 5 years	Because of fast growth and transparency, 5 years seems better to me. 10 years seems too long for accountability.	Yes	Yes	Yes	All of these are fundamental to best practices and inclusion.	Both a position or office and an advisory board or commission.	Of course! If we do not create this we do not concretize it. Partisan	Gives voter a baseline for what the candidate stands for.	Partisan	Gives voter a baseline for each candidates philosophy of government.	Increase number of districts to five	The County has outgrown the 4 districts. Adding another district (even 2) would improve overall representation of the citizenry.	Keep it at 10 years	5 is too short to assess the impact of any changes from the most current review.	Yes	Yes	Yes	Of course we need such oversight. Just look at recent history with a council chair and her cohorts promoting pandemic and vaccine misinformation. Are they really serving the public good?		Well I need more information. Sounds good on its face, but what power or authority will it have. Is it just another "Affirmative Action" effort - something that only marginally worked - or something somehow more effective? Need it's role and objectives to be well defined.
Partisan	I want to know if my county representation supports the policies of one of the parties or the other, especially when one is openly supporting white supremacists.	Partisan	I used to think differently until the CCRP went to the fascist end of the spectrum. I don't think the party represents some of the "Republican" candidates well, I'm sure it's difficult to be a Mitt Republican in this day.	Increase number of districts to five	The country continues to grow and grow. This will provide more representation although the chair position should rotate often to prevent one district from over-representation.	Keep it at 10 years	I feel that in this day and age with the majority of our population living in their own little castles and not really participating in community opportunities, with the amount of time needed to comb through the entire charter a 10-year cycle seems sufficient and prudent. I don't feel strongly about it though.	Yes	Yes	Yes	This has been a weakness in Clark County since I have lived here. It will be heartening to see ethics and Clark County government cleaned up and with better oversight.	Both a position or office and an advisory board or commission. Non-Partisan	It may make voters more likely to research a candidate instead of just voting based on party preference.	Non-Partisan	Same as above.	Increase number of districts to five	Rural voters seem to currently have outsized representation.	Change it to 5 years	Our community is changing rapidly so what works today may need to be reconsidered sooner.	Yes	Yes	Yes	Right now county politics feels like the "Wild West," where anything goes and councilors only feel responsible to fringe and radical factions in the community. There seems to be little accountability for councilors to act ethically, because as long as their district's base supports it, it doesn't seem to matter to them whether it's ethical or not. Sometimes the public doesn't know what's best and councilors should be held to a higher standard of civility and ethics.	Both a position or office and an advisory board or commission.	Clark County is always 5-10 years behind the average when it comes to addressing inequities in the workplace and in the community. We need to not wait around to address workplace DEI issues that are costing taxpayers money in the form of lawsuits and high staff turnover, and costing our community a higher quality of life and sense of cohesion.
Partisan	They should be open about their affiliation. The real issue with lack of representation diversity is the crappy way districts are drawn.	Partisan	See above. Non-Partisan	Same reason as above	Increase number of districts to five	In general I'm in favor of odd numbers in any kind of matter of votes and power, as it ensures there cannot be an even split.	Change it to 5 years	As our county is rapidly changing in many different ways, a tighter review cycle makes it possible to better reflect any changes that should happen.	Yes	Yes	Yes	Ethics and trust are incredibly important parts of any governing body, and any possible work to improve these should be considered.	Both a position or office and an advisory board or commission.	Ultimately someone needs to be accountable for the specific effort, if you only have an advisory board, it may be too easy to disregard any recommendations. At the same time, having an outside perspective on a topic like this can be crucial. It's too easy for straight, white, men like myself to pat our backs and say we've done inclusion. It's fundamental to continue to gather feedback from the very people you are trying to include, to ensure the efforts are in fact successful.

Partisan	Party affiliation tells voters a lot of information about candidate's ideology. Nonpartisan offices are still very partisan but more obliquely. I prefer transparency.	Partisan	For all the reasons I listed in question 1	Increase number of districts to five	Our population numbers are growing. It seems appropriate for every 100,000 residents to be represented on the county council.	Change it to 5 years	Even 5 years is too long. Clark County is experiencing an unprecedented growth and thus once in a lifetime (county lifetime not human lifetime) opportunities to strategically plan and act. I would like the Clark County Charter Review to be an ongoing commission to bring dynamic changes as necessary to the voters every year.	Yes	Yes	Yes	Every institution must have a code of ethics and ways to enforce it.	Both a position or office and an advisory board or commission.	Must have both a point person and an advisory board independent from councilors.
Partisan	Councilors focus a lot on policy. Would be good to know which way their political leanings are.	Non-Partisan	These are a more executive type positions and should be somewhat neutral as opposed to partisan positions. Some could even be appointed as opposed to being elected (Assessor, Clerk and Treasurer). Why are these 3 even elected?	Keep four districts	I like the ability to vote for at least 2 out of the current 5 councilors.	Keep it at 10 years	Unless moving to appointed charter commission members, keep it at 10 years. Non-Partisan	Our country is so divided based on partisanship. It's not helpful.	Non-Partisan	Just looking at party affiliation does not measure a person's values. Especially now there are such huge divides within political parties. A Republican can be a deranged QAnon antivaxxer or a person who believes in free markets and states rights. Huge difference. Same within Dem party.			Change it to 5 years	Feels like Clark County is changing fast.	Yes	Yes	Yes	When are these things ever bad?	Creation of an advisory board or commission. Non-Partisan	Doesn't make sense to have political parties having influence on candidates for these positions	Non-Partisan		Increase number of districts to five	Population growth	Change it to 5 years	10 years is too long	Yes	Yes	Yes	Because there are ethical problems happening in the council's office	Both a position or office and an advisory board or commission.	Diversity, equity and inclusion are not embraced by the county. It needs to be forced on the county leadership to get up to speed with the rest of the neighboring jurisdictions. It comes down to accountability. Leadership must be held accountable for not embracing and encouraging and enforcing non discriminatory policies and behavior. The most recent lawsuit is a perfect example.
								Yes	Yes	Yes			
Non-Partisan	I don't believe at the county level the political ideology of the candidates should be the primary driving factor in the voting choice. As it is a huge proportion of the voters will only choose based on the D or R or I after the candidate's name.	Non-Partisan	If the choice is all or none I choose non partisan. For some of those positions the non option is much more important than others, Eg Treasurer, Clerk but non for all is preferred to partisan for all.	Increase number of districts to five	The countywide elected chair was a great compromise between an elected executive and continuing with a "County Administrator." But smaller districts, 5 equally empowered councilors and a hand picked chair is almost certain to work better.	Change it to 5 years	10 years is too long between physical exams, oil changes and charter revisits.	Yes	Yes	No	For all county employees except elected officials there is in place a strong ethics section in the county HR policy manual. It includes clear remedies up to and including termination. HR and the line of management above the violator have sufficient power to investigate and discipline. Even if some elected official is found in clear violation there is no authority short of recall to remove from office. Fines and removal from committee assignments are not much of a disincentive or consequence.	A position or office within Clark County government that drives, advises and coordinates Department of Equity & Inclusion efforts.	sure, lets try that. hasn't worked when tried before or been successful in more than a tiny percentage of government organizations. But we have to do SOMETHING don't we?

Both a position or office and an advisory board or commission.	The County used to have an employee that was in HR that did diversity and the County chose to eliminate the position and never really did the work again until sued by employees. This will force the County to take this work seriously and implement changes necessary.

Non-Partisan	Partisan ideologies should not be taking a role in local government issues, such as land-use, homelessness, affordable housing.	Non-Partisan		Increase number of districts to five	The Chair should be elected from by the Councilors themselves, or rotated as they were in the past Boards of Commissioners. Elected officials may serve the "will of the people", but are not necessarily skilled nor experienced enough to carry through with the elected positions effectively.	Change it to 5 years		Yes	Yes	No	A need for both an independent commission and a compliance office is not clear to me.	Both a position or office and an advisory board or commission.	
Partisan		Partisan		Keep four districts		Change it to 5 years		No	No	No	No, as it would costs too much especially with an independent/contractor.		Where is the choice for "NO" on the above 3. Why create another government body, position, or office that costs tax payer dollars? We are in 2021. What would it prove or unprove?
Non-Partisan	No reason to politicize local decisions dealing with infrastructure, public health and protection of resources. Uppermost should be what best serves the community as a whole and is the best use of limited public resources... no special interests. For example, we have seen the politicization of public health issues that put the general public at greater risk.	Non-Partisan	See above.	Increase number of districts to five	Increasing the number to five would provide for better sub-region representation. If the five member council selects the chair, it should be on a 2 year term to better equalize power among the council members.	Keep it at 10 years	It takes time to implement changes. Every five years would put things in a constant state of flux.	Yes	Yes	Yes	The Council struggled when ethics complaints were brought forward and seemed to be used in a political way. There is no current process and so complaints were simply dropped. Given the political swings the Council has taken in recent years, it is important to have an independent oversight for ethics issues.	Both a position or office and an advisory board or commission.	Having both a position and a board/commission elevates this important issue and with both, provides more independence and oversight. As the question of systemic racism was question by some Council members, oversight, advice and independence of a DEI office and board is needed. Lives are at stake related to fairness in housing, health, economics, and education.
Partisan	Better to know their political philosophies that guide their preferences in decision making to better align themselves with citizens who vote for them.	Non-Partisan	Civil servants carry out the will of the people, set up by county councilors that are politicians. These positions serve all of the people, regardless of party affiliation.	Increase number of districts to five	Five councilors would always break stalemates.	Change it to 5 years	Better to be able to adapt to changing populations, conditions and circumstances in the County.	Yes	Yes	No	Ethics in Government is critical to effectively carrying out it's mission. An independent Ethics Commission would investigate and then administer any correction if needed.	Creation of an advisory board or commission.	Just the one option, as the office I feel would be overkill.

Increase number of districts to five	Five districts would better reflect the needs of different parts of the County. We need to renew trust in local government.	Both a position or office and an advisory board or commission.	I am appalled at the absence of cultural competency, dogma, and willful ignorance on such matters as systemic racism, social determinants of health, and response to COVID topics like masks and vaccines that some in our County Council demonstrate. Having lived in the unincorporated county for 40 years what is going on is at least an embarrassment and more importantly is just plain dangerous. I am reticent to add additional cost structure to local government however if we can't get it right on something as simple as making this a safe and inviting environment for everyone who lives here, having both internal capacity and capability committed to equity, plus external oversight, would be a step forward. That this 60+ year old, white, male, cisgender, married, financially secure, homeowner is increasingly embarrassed to call Clark County home I can deal with. Non-Partisan	We are talking about our form of local government here. In other words the framework as to how it is designed to operate. The Commission should be working towards the goal of making government accessible and answerable to all without putting a politicized finger on the scale.	Non-Partisan	These positions are effectively the "operating systems" for our government. By politicizing these offices you effectively move the "Who can run the office best" to a secondary position behind politics.	Keep four districts	I believe Clark County is becoming big enough to have more representation. The problem comes is with gerrymandering. If we allow over-politicization of the district forming process we all lose.	Change it to 5 years	Don't tinker with the process if it doesn't need it but we need to have a shorter duration between Commissions just in case we find something isn't working and it needs to be addressed.	Yes	Yes	Yes	Although I believe "ethics oversight" can be overdone and is often variable due to the politics of the day we need to have some policies in place and an active mechanism of enforcement if necessary. Issues need to be discovered early and dealt with quickly.		While we absolutely have issues within Clark County I believe that CURRENT problems are overstated and often an over-reach can make the "cure" worse than the underlying disease. Yes we need to deal with the issues but this issue has become over-politicized. If we are to have an office or mechanism to work through these problems, strong controls should be put into place to make sure that the office does not become a McCarthy like organization.

Partisan	I'd like to know how they're likely to prioritize and vote.	Partisan	Political ideologies affect job performance	Increase number of districts to five	As the population has grown and expanded since the commission was created, those areas should be equally represented.	Change it to 5 years	Too much can happen in 10 years, and our rate of population growth, will likely require changes within the next five years.	Yes	Yes	Yes	Oversight is needed to protect citizens and jeep the council, honest.	Both a position or office and an advisory board or commission.	Clark County is run by too many old white Christian men.
Non-Partisan	With party affiliation, people may vote without learning about what the candidates really stand for. Plus, the positions do not make decisions based on traditionally partisan issues. What they deal with is nonpartisan issues and this should be reflected in the voting process.	Non-Partisan		Increase number of districts to five	Increase the number of districts to five, but go back to the previous method of chair selection where it rotates among the councilors.	Change it to 5 years	It is still early in the charter's history so there is more room for amendments. I think for the next 20 years or so they should be every 5 years and then move back to every 10 years.	Yes	Yes	No	I agree with an ethics code and independent ethics commission. However, I'm not sure an ethics oversight and compliance office is necessary as it would be an additional expense on tax payers and the office couldn't be as independent as a commission could be.	Both a position or office and an advisory board or commission.	Equity is very important and our county should show it is truly invested in equity in our community.
Non-Partisan	Being an independent myself, I prefer to vote for the candidate rather than the party. I would like to hear from each individual on how they think about important issues.	Non-Partisan	I think if politicians didn't have to worry about upsetting their party they would be more likely to do things for the good of all people.	Increase number of districts to five	Clark county has grown.	Change it to 5 years	Only way to stay current.				Don't know enough particulars to form an opinion.		I don't want to create more government, I worry about taxes going up. I would like to think that we in Clark County are inclusive although unfortunately that's not always the case. We should encourage more diverse people to run for office.

Non-Partisan	I think the best person for the job should be elected, not based on party lines.	Non-Partisan	Same as above	Keep four districts	Due to budget.	Change it to 5 years	Our world moves 100X faster than in the past. A lot can change in 5 years.	Yes	Yes	Yes	Because voters are sick of not having any transparency in government. It would be nice to know there was an "official" code. I'm not sure a whole office is required, prosecuting attorney's office should handle the complaints.	Creation of an advisory board or commission.	Again, we don't need MORE government offices. Paid positions are expensive for 1 FTE annually, it's about 150K.
Partisan	That tells us what direction the person will vote and guide the county.	Partisan	Same reason as above. The political party determines how the person guides their decisions.	Increase number of districts to five	The councilors would have to work more within their area.	Keep it at 10 years		No	No	No	Because this is promoting dividing the country even further by having everything to be about racism and unfairness.		Create no new positions!! Diversity and equity are just creating more problems and breeding more hate towards the white people.
Non-Partisan	I am more interested in what a County Councilor has accomplished or not accomplished on behalf of Clark County than their political affiliation.	Non-Partisan	Same as last question	Increase number of districts to five	An uneven number can help prevent voting deadlocks.	Change it to 5 years	Too much can change in 10 years	Yes	Yes	Yes	All elected officials should be accountable to the public for their behavior and subject to a code of ethics. Anything less is an invitation to abuse power.	Creation of an advisory board or commission.	An advisory board or commission is sufficient. No need to create another (expensive) office in county government.
Partisan		Partisan	Hopefully it will help me to see what they stand for.	Increase number of districts to five	More opportunity to have a say.	Change it to 5 years	To address issues more often	Yes	Yes	Yes			I'm not in favor of this indoctrination. I believe it's race hate teaching.
Non-Partisan	I think people are more likely to be honest if they don't have to adhere to the party line.	Non-Partisan	No party, more likely to speak their own minds without fear of repercussions.	Increase number of districts to five		Keep it at 10 years		Yes	Yes	Yes		A position or office within Clark County government that drives, advises and coordinates Department of Equity & Inclusion efforts.	
Partisan	Because liberals tend not to have solid principles.	Partisan	Liberals have no principles.	Increase number of districts to five	Because it would strengthen our voting integrity, faster accurate counting, and less chances for fraud.	Change it to 5 years	To keep current and up to date with social changes faster.	Yes	Yes	Yes	Too much corruption in government.		Equity is unconstitutional.
Non-Partisan	The answer is obvious	Non-Partisan	Really I have no opinion one way or the other	Increase number of districts to five	5 would be better, I live in Washougal and don't align myself with N Clark County	Change it to 5 years	Keep up to date with a changing county	Yes	Yes	Yes	This is an obvious reply. The county commissioners are. A joke right now	Both a position or office and an advisory board or commission.	
Non-Partisan	No need to "cross the aisle" to reach agreements.	Non-Partisan	Political party influences can be dogmatic.	Keep four districts	To avoid 3-3 tie votes	Keep it at 10 years	Stability	Yes	Yes	Yes	Some oversight of the county commission	Both a position or office and an advisory board or commission.	Our county personnel and workforce should reflect the population they serve.
Non-Partisan	Partisanship is the reason government is a mess. Bipartisanship is no better because it doesn't accurately represent the fact that our nation and even our county are not equally divided between 2 parties. Real representation is nonpartisan.	Non-Partisan	Parties divide the voting electorate for the sake of party agendas which are really power grabs and those who seek elections shouldn't be running for the purpose of grabbing power, they should be running to serve the ENTIRE POPULATION of the area they would serve instead of just those who vote for parties. Partisanship isn't real service its a power grab.	Keep four districts	4 districts reduces the chances of gerrymandering. In fact I think we shouldn't have disyricts as the entire county doesn't need to be divided up as long as there are partisan positions. There should just be at large nonpartisan seats.	Change it to 5 years	At the way things change and grow we should be having a shorter time for review. Too much can change in 10yrs.	Yes	Yes	Yes	Having this reduces levels of corruptions within local government. Please do this. Clark County has the chance to become a much more principled shining star in WA State and this would definitely do it.	Both a position or office and an advisory board or commission.	We need both because this allows for those who seek more diversity inclusion a visible chance to be included in the policies that directly effect them.

Non-Partisan	county-level policy does not deal with traditional partisan issues. Keep the 2-party political mess at the state level, please!	Non-Partisan	These positions don't handle partisan issues	Increase number of districts to five	There is no need for a county chair, aside from presiding at meetings. The council-manager form does not normally include a separately elected chair because it is unnecessary and tends to introduce an inappropriate tension between the chair and the appointed manager		I'm neutral on this	Yes	Yes	Yes	Trust in government is a paramount need. We should go to extraordinary lengths help leaders be as ethical as possible and show constituents that they can trust their government.	Both a position or office and an advisory board or commission.	The county has a history of having difficulty handling these issues. A position DEI and board would augment the ethics commission/position.

Non-Partisan	I think it makes it too easy to villainise or hero worship a candidate based on a letter after their name. Non partisan candidates force voters to investigate the candidates stance on issues.	Non-Partisan	Voting party line is the lazy way some people vote. I want specific about a candidate!	Increase number of districts to five	More reps bring it closer to the people (rep to population ratio). Also, 5 is an odd number, making voting ties much more difficult	Change it to 5 years	We are having an influx with changing demographics. Soooo many apartment complexes going up in the county. I would say 5 years would be helpful as long as this process is not a big budget buster.	Yes	Yes	Yes	Corruption in government has held back many other nations worldwide for decades, if not centuries. Having lived many places, I've noticed that we are one of the few nations that have relied heavily on trust and EXPECT honesty and integrity, and that has lead to USA's incredible economic growth since 1776. Trust in government and law enforcement have declined precipitously lately. We need transparency and a specific code of ethics to rebuild and reestablish trust in government. Having people of KNOWN integrity from our community— of all socio-economic levels, ethnicity, race, religion, and culture serving as an ethical watchdog group, with a written established code can make it so much harder to have accusatory claims made against the government, which can be a big cost savings. Dare I say, I LOVE Government transparency?	A position or office within Clark County government that drives, advises and coordinates Department of Equity & Inclusion efforts.	I think diversity, equity, and inclusion are great causes in the true definition of each word. When it becomes code for a specific ideology, it is no longer useful, it is detrimental. If think if we bring in someone who can keep an open mind, I'm for it.

Also, for community members who don't have time to review all stances they can trust their party preference will give them insight on who to vote for.	Partisan	Same reason I posted before	Keep four districts		Change it to 5 years	Absolutely should be a maximum of 5 years. We have touch growth that needs addressing. Yes	No	No	We don't need more beaucrocat positions that make it harder for good executives to lead. Ethics code is good and I believe our mission as a county already addresses most of it. Non-Partisan	We need the chance to pick councilors based on their skill set and experiences and take political parties out of it. We need councilors that work for the entire community and not just their fellow party members. We need to elect people that will get the work done instead of stagnating under an ideology.	Non-Partisan	There is not a good reason why these positions should be partisan.	Increase number of districts to five	District 4 is much too large for one councilor to be able to serve the needs of all. This is a diverse district in many ways and might be better served if split.	Change it to 5 years	Five years makes much more sense given the rapid changes in the county.	Yes	Yes	Yes	Yes - we can't allow elected officials to base their work on personal beliefs that don't align with the needs of the community, such as claiming there is no systemic racism here. Partisan	How else do we have an even general notion of what a candidate's political stance is? Campaign statements too often amount to "I've lived here a long time and I care." That doesn't tell me if someone is more likely to be progressive or reactionary. A party affiliation gives at least some indication of that. Keep it at 10 years	This is an arduous process. We don't need more time spent on it.	Yes	No	No	We don't need more government. Ethics complaints should be aired at election times. Why would you not include and option of neither? That would be my answer. While I support inclusion, I don't support any proposal whereby minorities gain the power to take rights away from the majority. Partisan	I would rather know what party affiliation County Councilor is.	Partisan	It is clearer to me to know what party affiliation is associated with a position.		Not sure how to choose this? I feel that my neighborhood is part of the city and I have a different point of view than the country property owner due to what laws may be more valid for me.. So I would really need to know if this is the reason why you are making a new district. I need to know more on this.	Change it to 5 years		No	No	No	I am not sure why you need to do this? Non-Partisan	I would rather that voters vet candidates on their positions, rather than vote simply based on party lines. I feel this would also motivate candidates to state their positions more clearly if they can't rely on an automatic vote from constituents who share their party.	Non-Partisan	Political parties should not be relevant to these positions. I care more that candidates clearly state their plans and goals for what they will do if they're elected.	Keep four districts	I don't currently have enough information about the proposed change to support it. I would have to know more about the boundaries of the proposed 5th district, the reasoning behind the change, and the process for appointing the council chair. With more information I feel I would probably support the addition of a voting district.	Change it to 5 years	Too much can change in 10 years. It's better to stay as up to date as possible. Non-Partisan	Politics should not be a part of land ownership, property ownership, stewardship of natural lands etc. In addition, at times like these when there is a majority, the minority gets left out completely. As areas become more and more left leaning, decisions will become bogged down and nothing will get done.	Non-Partisan	Same as above comment. Partisan	I WISH the decisions made by councilors were non-partisan and strictly for the good of the community and members served. However, many critical decisions that are made regarding community planning, infrastructure, schools, development and public health are made with bias and political sway. It is important to know the direction a candidate leans to ensure that citizens/voters have a "cue" into the mindset of the candidate. The information in the voter's pamphlet is not easy to decipher and it is difficult to tell a candidates intentions.	Non-Partisan	The candidates for these positions should be based primarily on job experience, merit and integrity. These positions should require minimum qualification standards for applicants (i.e. one should not be placed on the ballot for the position of Treasurer without an education in finance, experience with budgets and financial projections etc to ensure the integrity of the position is maintained).	Increase number of districts to five	If the Commission's recommendation is to increase the number of voting districts, it would be most helpful to know WHY--- I could see that increasing the districts to five may prevent voting ties, but also may make it more challenging to ensure quorums are met. Increasing the elected officials also makes meeting with them on "one-on-ones" (as departments often do) a bit more cumbersome.	Change it to 5 years	Our community is rapidly growing, changing and modifying. It is important that our reviews be done when the information can be potentially shared from past members and key participants. A lot can happen in a decade; policies, procedures and growth plans need to remain current to be relevant.	Yes	Yes	Yes	Ethics oversight spans within every aspect of our County government. Public Health ethics dictate infrastructure to dispense medication and ventilators (as evidenced by our current global pandemic). Ethics may come into play for Community Development and Public Works for example to ensure that sidewalks, public transportation needs etc. address social determinants of health for access to food, health care and schools; that roads are maintained to provide equitable service/access throughout the County.	A position or office within Clark County government that drives, advises and coordinates Department of Equity & Inclusion efforts.	In my experience, advisory boards are comprised of wonderful and involved volunteers from the community that have families, jobs and commitments that stretch them far beyond the capabilities of evaluating, updating and/or developing ongoing training, policies, and coordination efforts that are needed for this type of role. Given the current culture of our community and nation, there needs to be a dedicated resource that Clark County departments, community members (and our community partners- schools, churches, medical facilities etc.) can look to for guidance, direction, opportunities, engagement and change in the area of diversity, equity and inclusion.

Partisan	Even if the position was officially non-partisan, the councilors will have a leaning towards one party or another. It's helpful to have that be upfront rather than try to hide it. It will help with transparency.	Non-Partisan	These are all executive positions. Unlike the county councilors who create laws, these positions are charged with enforcing the laws and should not be done in a partisan manner. Therefore it would make sense to have them be non-partisan positions.	Keep four districts	I think the current system is working well. Don't really see a need to change it.	Keep it at 10 years	5 years doesn't really give enough time to see if changes enacted in a prior review are effective.	Yes	Yes	No		Creation of an advisory board or commission. Partisan	A candidate's or councilor's party affiliation gives voters at least a hint about their general political philosophy. The lack of this label allows too much leeway for a candidate to obfuscate about their actual values.	Non-Partisan	Except for sheriff, which I think should continue to be partisan, these offices don't generally follow a political philosophy (or shouldn't).	Increase number of districts to five	I'm torn on this one. Perhaps the chair should be elected at large to represent the entire county. Partisan	A party affiliation allows voters to understand the foundations of a candidate's views. without that information, candidates say anything to get elected and voters will not have a way of determining the validity of candidates' statements until that person takes office and begins to act on a previously hidden agenda. Non-Partisan	The issues that county government deals with should not be considered on a partisan basis. Party division does not give a good representation of how people want the county to be managed.	Non-Partisan	These are positions that implement existing law, and should be viewed in terms of how well they do the job of carrying out those laws, not how they stand on issues that are not related to the office.	Increase number of districts to five	As the population of the County grows, more districts will allow the Councilors to be more aware of the needs within their own district. Non-Partisan	The County Councilors focus should be on health, safety and livability issues that impact our community - homelessness, economic growth, infrastructure, COVID, etc... These issues have no place for partisan politics, which all too often, get in the way of reaching actual solutions.	Non-Partisan	The role of each of these "Department Directors" is to facilitate the work that each of these departments is charged with. Again, partisan politics has nothing to do with how the Sheriff protects our community or how the Assessor determines property values for taxation. Likewise with the mission of the PA's office, the Clerk's office and all others. Party affiliation should not begin until you've reached the State level of office.	Increase number of districts to five	The district boundaries need to be re-drawn such that Districts 2 & 4 and a Fifth District are more evenly spread apart. These are all rural districts with a similar population density (outside of the small City areas) and representation should better reflect that condition.	Change it to 5 years	There is a sufficient amount of dynamics happening within Clark County to warrant reviewing the charter on a 5-year rotation as opposed to a 10-year cycle. And - that is not likely to change very soon. Issues such as how the rural areas are impacted by urban growth and how we deal with major livability issues are not expected to go away any time soon. Its good to stay on top of those as it relates to our charter and how our government operates.	Yes	Yes	Yes	Over the past 15 years, Clark County has had its fill of elected officials that don't always follow the rules. The County just came out on the losing end of a lawsuit that started when two "then Commissioners" decided to forego the standard required HR hiring process and picked one of their buddies to run a County Department that has since then been disbanded. And that is just the tip of the iceberg.	A position or office within Clark County government that drives, advises and coordinates Department of Equity & Inclusion efforts.	I think a good place to start with DEI is a position that reports directly to the County Manager. This is the model that the City of Vancouver is following and so far, it appears to be working. As DEI becomes more a part of every day life with the various County Departments and Program, it may be appropriate to pivot to either more DEI staff within a division structure and/or an advisory board or commission. There is a lot to understand and learn at this point so I think a commission would be premature.
Partisan	So we have a better idea of where the candidates are coming from politically. What is said during a campaign doesn't really tell me what they believe.	Partisan		Keep four districts		Keep it at 10 years	I don't see the commission as value adding.	Yes	No	No	The expectations must be spelled out but we don't need more bureaucracy in county government.	Creation of an advisory board or commission.	Less bureaucracy.
Non-Partisan	It helps eliminate the extreme candidates from the process. Independents and third-party candidates have a better chance of beating traditional candidates. Candidates would be more free to state their true beliefs, rather than pandering to their party and framing their stance on issues to appeal to the more extreme voters. Reduce the gamesmanship that goes on in party politics.	Non-Partisan	Eliminates blind, straight-ticket voting where uninformed voters simply bow to their party ideals regardless of the merits of the individual candidates. Reduces the influence of political parties where currying favors to the higher-ups and lobbyists within the party are commonplace.	Increase number of districts to five	Increasing the number of voting districts to five will all for more representation and differing opinions.	Change it to 5 years	These are rapidly changing times, so it will be better to review more frequently. There won't be as many changes at the 10 year point. Half will get done at the 5 year point.	Yes	Yes	No	Yes, we independent Ethics Commission help us with an Ethics Code, but I'm not sure we need a whole new Ethics Oversight and Compliance Office. Perhaps we can get by with an Ethics Oversight and Compliance sub-committee or just self-comply, self-monitor, self-report.	Creation of an advisory board or commission.	Start small and only grow if needed. We can start with an Advisory board, and if we need more then we can create a position. If we need more, then we can create the office.
Non-Partisan	Local issues do not need to be framed by partisanship. Candidates will be encouraged to state their goals, positions and recommendations for achieving progress in our communities, without having to choose a party. There are lots of Independents that would benefit from not having to choose or state a party.	Non-Partisan	None of these positions need to be partisan, these elected officials need to be elected based on their qualifications and goals, not on their party. Again, lots of independents are qualified and may not want to choose/state any party affiliation.	Increase number of districts to five	Our current Council Chair believes her vote on Council means more than other councilors since she received more votes (of course, she was elected county-wide whereas all other councilors were elected by district). This kind of thinking needs to not be supported, even by illusion. I believe that annually the Council ought to vote in a Chair, with that individual knowing that they will be elected by their peers and serve as Chair for that year. This better serves all county residents and will provide more balanced decision-making by the Council. Five districts will more fairly allow for better representation for all county residents.	Change it to 5 years	Although I have concerns with the slow progress of the current Charter Review Commission, I do think that a review in 5 years makes more sense. Our county is new at this charter process and the proposed amendments are important to me. Until voters make decisions on the proposed amendments, we will not know how the charter will be updated. Ten years would be too long to go with only 4 districts or having a Council Chair elected countywide. DEI is too important to have to wait 10 years if that amendment is not voted on.	Yes	Yes	Yes	Ethics in government is an important concept for me. The lack of civics education in our state and nation in the past 20+ years has impacted residents basic knowledge of how government and elected offices operate. WA state took an important step forward when the legislature voted for the high school graduation requirement of 1 semester of civics education as a standalone course. Unfortunately, until this education of more of our voting age population occurs, there are too many residents who will need to be reminded that ethics is an important component for our government to function. All elected officials and government employees need to meet ethics goals/requirements. Education for our county and communities will be important for us to understand how this ethics code and/or ethics oversight and compliance and commission will benefit us.	Both a position or office and an advisory board or commission.	Our county needs this yesterday. Current County Councilors statements, lawsuits by county employees, sheriff deputy shootings of young black men or individuals with behavioral health issues, etc. Lots of corporations have had these in place for a while and it is time for our county government to step up on DEI. If this is not included or approved by voters, all county taxpayers will be impacted financially. Our county has been voted out of the statewide risk pool for counties due to poor decision-making by county leadership in the past. We are looking at a bleak financial future for our county without this in place.

Partisan	Most people can't keep their political beliefs separate from how they would vote on different positions that affect all who live in Clark County. I want to know their party affiliation before I vote for them.	Partisan	Same answer as above. We need to know their party as their party does affect how they will make decisions for all who live here.	Increase number of districts to five	I'm not too sure about this answer, as I don't know how you would divide the four districts into five. Is it by population or geographic location or what? But, usually 5 to make decisions would be better than 4. More opinions, more discussion.	Change it to 5 years	Too much change would happen in five years. Non-Partisan	To be held accountable for policy and voting record for constituents rather than their Party.	Non-Partisan	Same answer as 1.	Keep four districts	Keep 4 and study to understand the consequences of adding another.	Change it to 5 years	Things change too quickly to leave at 10 years.	Yes	Yes	Yes	These are too important to not be included.	Creation of an advisory board or commission.	This will help our communities grow and prosper.
Partisan	While I hope people do their due diligence and look at the candidates they are voting for, I think it is important to know where candidates may stand on issues, and for someone who did not research candidates, know who may align with their views the closest.	Non-Partisan		Increase number of districts to five	I am in support of this especially because of the council chair position. It is not currently fair that two districts can choose to run for county chair without risk of losing their current position while the other two districts need to choose one or the other..	Keep it at 10 years	We need time to see how things work and correct themselves... every 5 years, we could potentially be making changes after each major election..	Yes			I'm not sure on this... I believe that there needs to be a code, but I am uncertain if this would require an additional paid staff, or if it would put additional duties upon current staff to make sure there is compliance... How would that be paid for?	Creation of an advisory board or commission.	While I am supportive of this, again, I am concerned with what the cost could/would be and how that would be funded? Of course a cost of hiring someone may be cheaper than litigation.
Partisan	It gives you a starting point to know something about a candidate.	Partisan	While every candidate is unique, this can help to provide some baseline for how the work might be approached.	Keep four districts		Keep it at 10 years	We need to allow enough time in between reviews to see how changes made work out in the real world. 5 years is not enough time to accurately measure, process and evaluate.	Yes	No	No	A code should suffice. I don't recall seeing the level of corruption or major ethical lapses that would justify taxpayer dollars to create an independent commission and compliance office. That could change in the future, and if the code is broken enough moving forward, then it would be time to make those moves.	Creation of an advisory board or commission.	An advisory board at most. There are a lot of questionable decisions being made at the moment in the name of equity, and we should proceed cautiously as the effects of those policies and rules are yet to be determined. While the goal is laudable, the methodology to achieving it is still very much in the debate stage.

Yes	Yes	Yes	The council wields a lot of power, we should have an independent monitor in order to prevent some of the abuses we've lived through in the past.	Creation of an advisory board or commission.	I want an INDEPENDENT advisory board paying attention to DIVERSITY, EQUITY & INCLUSION, but don't believe we'll get the best result by making it part of county government where it may be subject to distorting forces. Partisan	It helps to understand what background they support	Partisan	It helps to know what background they support	Increase number of districts to five	I feel it helps to distribute the area better. There are areas in this county where people live differently than those who live in the city areas and they should have a voice separate from the others. Too many people are lumped into one group and therefore leaves out some of the voices.	Change it to 5 years	I feel 10 years is too long.	Yes	Yes	Yes	When people know they are being held accountable by more than one entity, they will tend to act appropriately rather than make decisions based on their own agendas.		I think we are going WAY overboard on the diversity thing. I don't feel that we as a county are not as diverse as we could already be. The people who are being left out are the people who actually work and pay taxes in this county. It shouldn't matter what background or race they come from.
Non-Partisan	County Councilors should be elected based on their ideas, not the letter next to their name.	Non-Partisan	There is no reason for any of these position to have a political affiliation.	Increase number of districts to five	The county chair is not as recognizable as the head of the body as a mayor of an industrial city is within a city or town. It makes more sense for the head of the county council to focus on running meetings to make sure policy is set for the executive to execute.	Change it to 5 years	This would account for growth and shifts in demographics.	Yes	Yes	Yes	This should be established to be independent of the county council.	Creation of an advisory board or commission.	An advisory board would be a necessary first step, then that board can help determine if a position or permanent office is needed.

Partisan	People are ultimately influenced by the political party they are a member of. It is good for the public to know who their influencers are.	Partisan		Increase number of districts to five	As the county grows the representation of more populated areas is weakened as compared to areas that have fewer people. This results in certain areas having more power to make decisions for the county. Those decisions may not reflect what the majority of the people living in the county would like.	Change it to 5 years	Review doesn't necessitate change. It is however good to review earlier in case conditions have changed that rapidly and the charter needs revision. Being proactive with the charter helps better reflect who is living in the county at that time and what their needs are.	Yes	Yes	Yes	Every group needs oversight to ensure rules and decorum are maintained and respected.	Both a position or office and an advisory board or commission.	It is good to gain multiple perspectives when looking to address issues of equity and inclusion. What works for one group or fits the needs of a group may not also help the others that need to be seen, heard, and included in an equitable fashion.
Partisan	I think that the more transparent candidacies are, the better educated voters will be. The concept of non-partisan versus partisan would be preferable if this were a perfect world, but voters need to know as much as possible about the people they choose. A one page voter pamphlet does not cover even the most basic information.	Partisan	Same reason as my answer to question one.	Increase number of districts to five	As it is there is not enough representation for a growing population. Also, some districts are now drawn so that one party dominates locally and there is little opportunity for the other party to win.	Change it to 5 years	Ten years is too long to be proactive. Bad policies and errors in governing should be corrected when they no longer work for our community.	Yes	Yes	Yes	Our society is evolving into what we all hope will be a more just, equitable expression of our values with respect for all communities from youth to the elderly. Systemic bias is embedded in our culture and having an ethics oversight code, commission and compliance office is critical to protecting our democratic ideals, ethics and the actions of those serving the public.	Both a position or office and an advisory board or commission.	This is a no-brainer given our history and the disparities that now exist for 51% of our population as women and the discrimination now experienced by BIPOC, the elderly and other marginalized people. Non-Partisan	The idealist in me says that it would be great for them to be truly non-partisan, but I suspect that trying for that might actually be too naive. Non-Partisan	From what I've seen, people tend to more or less blindly vote following party lines. Having these positions be non-partisan would mean we the voters would have to actually look at the Councilors' stances are on different issues, policy platforms, values, etc.	Non-Partisan	Same reason as above, and I would really hope these individuals could consistently act in a nonpartisan way, as well.	Increase number of districts to five	It would be good to increase the number of districts to five ONLY if the lines are not drawn in a gerrymandering fashion. Increased representation (representative speaking for a smaller number of constituents, so more able to listen effectively to these constituents) is beneficial when it's not manipulated as a political tool. Districts should represent a roughly even number of PEOPLE, not size of land... because people vote and people deserve a say. Absolutely having an independent ethics commission would further improve trust in local governance.	Both a position or office and an advisory board or commission.	There should be both the position/office and a board/commission, for accountability and for increased support and the ability to research and keep up with current information/research, as is necessary with DEI. It is also important to note that "the intended outcome of increasing accountability and public trust in Clark County's operations and services" will absolutely not be met by creations of positions/boards alone. Just creating these things is lip service and if anything may decrease trust, unless those holding these positions Do The Work and make actual positive change that members of the community can see and feel.
Partisan	We are all political, let's keep it in the open	Partisan	Let's keep it in the open	Increase number of districts to five	More folks living here means increasing representation	Change it to 5 years	Time goes fast, lots changes	Yes	Yes	Yes	Oversight is important	Both a position or office and an advisory board or commission.	More rep, more visibility
Non-Partisan	Less right versus left and forces citizens to vote based on policy.	Non-Partisan	Force voting based on policy	Increase number of districts to five	More diverse opinions and representation.	Keep it at 10 years	Let the new/revised charter marinate and play out.	Yes	Yes	Yes	We have had multiple instances where councilors are out of line with little to no repercussions.	Both a position or office and an advisory board or commission.	We need an office as well as a board so that public input is possible outside of normal council meetings since a certain someone that runs meetings refuses to acknowledge systematic racism.
Partisan		Partisan		Increase number of districts to five		Change it to 5 years		No	No	No		Creation of an advisory board or commission.	
Non-Partisan	I believe it's more important to vote based on how each candidate intends to approach an issue. Not blindly voting for someone based on their party.	Non-Partisan	Same reason	Keep four districts	I would need more info on the reasonings and consequences. Every instance of redistricting I'm familiar with resulted in negative consequences such as gerrymandering or redlining.	Change it to 5 years		Yes	Yes	Yes	As long as the commissions are diverse and not stacked with stakeholders of politicians or law enforcement.	Creation of an advisory board or commission.	A single position is a nice sentiment, but sometimes doesn't lead to anything. It can be used for show. Same with a board or commission, so we would need to ensure the board is diverse with most non-stakeholder members. We cannot be stacking these boards with politicians, stakeholders of politicians, or law enforcement.
Non-Partisan	Having the positions be non partisan forces voters to vote based on the merits of the candidates rather than their noted political affiliation.	Non-Partisan	These positions should be filled based on the merits of the candidates, not on their political affiliation.	Increase number of districts to five	The county has grown so much, more representation is better.	Change it to 5 years		Yes	Yes	Yes	There is currently no independent oversight and our county has a history of corruption. The current system relies on the folks who may be acting unethically to determine what is and isn't ethical.	Both a position or office and an advisory board or commission.	It's embarrassing that we are only now considering a DEI board or officer, especially considering the history of this county and council. More oversight is better. More diversity and equity is better.

Non-Partisan	Local governments should be non-partisan, counties, city, and towns.	Non-Partisan	Counties, city, and town governments should be non-partisan.	Increase number of districts to five		Change it to 5 years	County continues to grow quickly, and a 5 year cycle is about right.	Yes	Yes	Yes	This is important for a governmental agency of this size & impact.	Both a position or office and an advisory board or commission.	It's time.
Non-Partisan		Non-Partisan		Increase number of districts to five		Keep it at 10 years		Yes	Yes	Yes		Creation of an advisory board or commission.	
Non-Partisan	Running for partisan offices allows candidates to hide behind a "D" or "R" and dodge discussing local issues and solutions. (I don't care if they're progressive Democrats or conservative Republicans; I want to know what their priorities are and what they will do.) Until recently, Clark County had a history of electing commissioners/councilors who were not overtly partisan, including moderate to conservative Democrats and relatively progressive Republicans. Party affiliation had little bearing on how county elected officials conducted business. Voting blocs on the commission/council coalesced around issues, perspectives and priorities, not party identification. Yet that affiliation continues to play a decisive role in elections. Two Republicans, Marc Boldt and John Blom, attempted to run without party affiliation. Boldt won his first election but lost his second; Blom was elected as a Republican and was voted out when he dropped the "R." Finally, far too many legislators at the state and federal level have become caustically partisan. Does anyone really want to see the nasty bickering and	Non-Partisan	It actually makes even less sense for these officials to be partisan that county councilors because these elected officials are primarily administrators who enforce/implement laws, instead of making laws. Should partisan politics influence how elections are conducted? (If you don't know what I am talking about, you need to pay more attention to recent news.) Should partisan politics affect how much my home is assessed for or which crimes the sheriff's office investigates? School board members, city councilors, fire commissioners and other local elected officials are all nonpartisan, and there is no reason why these positions shouldn't be as well. One final thought: Candidates for county office could still express their party affiliation on signs, brochures and other materials. They just don't get free advertising on the ballot.	Increase number of districts to five	This would give more specific representation to distinct geographic areas in Clark County. I don't know how the five districts would be drawn, but it generally would be positive for rural north county to have its own representative, instead of someone whose constituents primarily live in the urban unincorporated area north of Vancouver. I am not sure how confined the county is by the "one topic per ballot measure" rule at the state level. It will be imperative to structure these one (or two) charter amendments so voters cannot add a fifth council district but also retain an elected countywide chair. You may believe that voters would not make their ballots like that; I believe the charter review commission must prevent that from happening.	Change it to 5 years	I believe Vancouver appoints a charter review commission every five years. Changing this section would remove a weakness in the current charter, the language that reads: "Five (5) years after adoption of this charter and at least every ten (10) years thereafter, the council shall cause an election of a charter review commission." I have never understood a vague provision that allows the council to call for charter review anytime it wants, as long as it's at least once every 10 years. The county charter should be precise in its requirements. Besides, once every 10 years is not frequent enough given the increasingly rapid rate of change today. The charter review commission also should propose tightening Section 9.6, which seems to allow the council to propose charter amendments whenever it wants, as long as voters will decide their fate in the next November general election. It's gratifying to read that at a council	Yes	Yes	Yes	I generally support this, but the devil is in the details. It's all in how it is structured so it doesn't become weaponized by people looking to tear down political or personal opponents.		I support society's emphasis on diversity, equity and inclusion, but a charter amendment on this topic is drilling way down to how the county operates, not how county government is structured. This is something that falls under the purview of the county manager, with the county council providing overarching direction and oversight. Adding a charter amendment for diversity, equity and inclusion would open Pandora's Box for other amendments that, however well intentioned, do not belong in the county charter.
Partisan	The community has a right to know who they are electing. They represent us, after all. Partisan	It tells me much valuable information.	Partisan	Why not	Increase number of districts to five		Change it to 5 years		Yes	Yes	Yes	I trust non of you.	Both a position or office and an advisory board or commission.	We need much more diversity.

There should also be clear consequences of unethical behavior.		Again I would want the smartest most qualified people no matter race or gender.
Partisan		Partisan		Keep four districts		Keep it at 10 years		No	No	No			None of the above. You should have an option for no office of Diversity Equity & Inclusion
Non-Partisan	Partisan behavior is in conflict with serving the interest of the community .	Non-Partisan		Increase number of districts to five		Change it to 5 years		Yes	Yes	No	I'm concerned about one person having the position of compliance officer.	Both a position or office and an advisory board or commission.	You need both.
Partisan	Party affiliation, although no one follows lock-step with every idea of their party, gives the voter a glimpse of what the candidate believes in and will therefore bring that slant/viewpoint to the position. Removing the affiliation will obscure the person's leanings for most of the electorate.		Auditor, Clerk, Prosecuting Attorney and Sheriff should be non-partisan, as the positions should be neutral toward all parties. The others should remain partisan, as that shows some of what their beliefs are, which will influence the position's actions.	Increase number of districts to five	Putting the number to an "odd" selection (3,5,7, etc.) assures that decisions can be made. With an even number, too often decisions will be tabled due to there not being a majority. (Split 2-2 votes is possible with only 4 positions.	Keep it at 10 years	Changes take more than 5 years to show their colors. A quicker review would lead to "churn" where the change effects cannot be isolated to other factors.	Yes	No	No	Having a code sets behavioral expectations and guidelines that the public can evaluate performance against, and if violated, can bring recall actions or in extremis, criminal charges against the violator. The other two are just government trying to expand itself.		None, there are plenty of laws/regulations and agencies at state and Federal level that attempt to provide their vision of Diversity, equity and inclusion. A County level position is just governmental waste. As seen with the current Judicial decisions against the County, there are resolutions to perceived inequities. Use what is currently there, no need for another bureaucracy.

Partisan	I believe transparency is important from our officials.	Non-Partisan	These positions should not be affected by partisan lines. These people need to do their jobs and not be hindered based on a perceived viewpoint.	Increase number of districts to five	Clark County and Washington is growing quickly. Both a position or office and an advisory board or commission.	I don't believe Clark County's best interests can be represented by one or a small number of people.
Non-Partisan	In years previous to 2016 I would say it doesn't matter, however, the partisan divide has made any type of collaborative government nearly impossible. I worry that perception of the 'party line' has rendered any type of logical thinking (regardless of party affiliation) nearly impossible.	Non-Partisan	Same feelings as question 1.	Keep four districts		Change it to 5 years	The area is under tremendous growth and development; evaluating the charter at a shorter interval makes sense considering the expected growth. Partisan		Partisan		Increase number of districts to five		Change it to 5 years		Yes	Yes	Yes	To provide more accountability and oversight.	Both a position or office and an advisory board or commission.	
Non-Partisan	There are too many uneducated, complacent voters who will only vote based on party lines. Then what we get is a crazy person in office (ie Trump) who probably wasn't really what those voters wanted in office. By removing party affiliations, voters will need to research candidates and find the one that best fits their personal beliefs. This will result in County Councilor's who are truly representatives of the people who voted for them.	Non-Partisan	Why are these positions partisan in the first place? None of these positions allow for the elected people to do their jobs based on party affiliation - they all have to be unbiased. Especially the Prosecuting Attorney. Again, this can result in voters selecting someone based only on their party affiliation. What if a Republican was running with 25 years of phenomenal treasury experience against a Democrat that has no business running for anything (think: Mike Pond)? The result could be the Democrat gets elected because of affiliation only, and they turn out to be someone who doesn't know how to balance a check book.	Increase number of districts to five	The districts should be increased to five for a few reasons. First, as noted in your question, this eliminates an "at-large" Councilor becoming the chair. The executive officials should be selected after the election based on who has the most experience. What you will get otherwise, at it appears you have that, is a politician who runs for the at-large position to get to be in charge of the Council, not running to represent all the people of the County. I believe your current chair is a great example of this. She got the title, and only represents folks for her district, despite being an at-large representative. If folks run based on wanting to represent people, and not gain power, you are more likely to have a more well-rounded board. Additionally, the population of Clark County has increased approximately 11% since 2014, with the majority of that increase within the City of Vancouver. Re-districting to represent the population centers makes sense. It should probably be assessed often.	Change it to 5 years	As stated in Question 3, the population of this area is growing quickly. A lot can happen in 10 years, and it is important to have healthy governing documents that represent the people and current state of the County. How do you get a healthy document? Same way you get healthy humans - with check ups!	Yes	Yes	Yes	This question probably could use a little more information - it is a bit confusing to read. If I am understanding it correctly: 1 - Should Clark County have an Ethics Code? Absolutely! Hold people accountable and help to create a more transparent government. 2 - Should Clark County's Ethics Code have an independent Commission? Assuming this means a commission from outside Clark County, then yes. If it is just outside of the County, I am not sure that would work. This would need to be professionals with 'no dog in the fight' to be truly effective. 3 - Should we have another office in the County, specifically to enforce ethics from our elected officials? - Yes, and based on what I have seen from many of your elected officials, this person will be BUSY.	Both a position or office and an advisory board or commission.	Yes, there should be a position created, and it should NOT be an elected position. This person will need to be completely unbiased and educated on DEI. If it is an elected position, anyone who wants to pay the PDC could run for it. This is not a position that can be filled without the right experience. An advisory board of citizens would be best. Again, no elected folks part of this. True representatives with no political gain intended. And get them from underrepresented communities.

The last thing we need is another of those efforts and a new commission spending money and making rules. Get real.		Where is the answer...none of the above? This question presumes the only possible answers are some sort of board or commission when there should be nothing such at all. The wording of this questions creates a biased response set of options that invalidate the question and raise serious concerns about this survey.
Non-Partisan	Take a wild guess.	Non-Partisan		Increase number of districts to five		Change it to 5 years		Yes	No	No		Both a position or office and an advisory board or commission.	
Non-Partisan	Elected county commissioners represent all citizens when holding office. The policies made should be good for all local citizens and not from a national platform.	Non-Partisan	Again, elected officials represent all citizens in the county and should work to serve all.	Increase number of districts to five	More representation.	Change it to 5 years	The rapid growth of our county should be reflected in the charter sooner rather than later.	Yes	Yes	No		Creation of an advisory board or commission.	An advisory board is appropriate.
Non-Partisan	Political parties have little to no bearing on the work of the Council, and political alliances can actually get in the way of that work.	Non-Partisan	Again, political affiliation has little to nothing to do with the work of offices such as assessor, Prosecuting Attorney or Sherrif. Leaving them partisan only serves to encourage partisanship in the execution of that office's duties.	Increase number of districts to five	Clark County is growing, and with that growth comes a diversity of needs from the residents. Increasing the number of districts to five just makes sense - and I would add that including language in the Charter to allow for such increases in the future as the County grows in population would be a good idea. I like the idea that the Council chair would be appointed on a rotating basis, and for a limited time during the council's session. Rather than allowing any one Councilor too much power, a one-year term for the Council Chair who would then pass that position on to another Councilor would allow for a continuity of leadership but diversity of thought and direction.	Change it to 5 years	The growth of communities across the Pacific Northwest is likely to increase over the next century. I think that allowing for more frequent review is a sound idea.	Yes	Yes	Yes	This is an important check to balance the power of County officials - I would only support this as a final recommendation, though if a) The Ethics Commission is truly independent, and elected by the public b) The findings of the Ethics Commission have a real impact, and aren't just "recommendations" or a slap on the wrist. If we're going to hold our public officials accountable, the findings of this Commission must have real "teeth."	Both a position or office and an advisory board or commission.	If the County is serious about instituting change, a citizen Board with diverse viewpoints is the best way to gather information about which changes should be made. Once that Board releases its findings, the officeholder in the proposed position can execute those changes effectively without the recommendations getting swept up in other County business or political fights.

Partisan	I want to know what individuals proclivities are.	Partisan	I want to know what someone's proclivities are.	Increase number of districts to five	I say five with the caveat that it would depend on how this is carried forward. IF it is done in a gerrymandering fashion then it will be a disaster. IF it is done in a reasonable manner, based on population alone, then it has a chance of being beneficial. However, for voting and passing what comes before the Commission the tie-breaker will have immense power.	Keep it at 10 years	I would say 7 years is more reasonable. 5 years barely has time to see what the effects and results of any changes will be. 10 seems too long to correct any problems that arose. So, I err on the side of caution and keep it at 10, unless you change it to 7.	Yes	No	No	I am not certain a Commission and/or an Office would be beneficial. If the heads are political appointments, they often result in bias and untoward results. I think if an Ethics Code is violated, then a Commission to investigate should be formed. Partisan	Partisan, because it is a lie when someone claims to be nonpartisan. Open and honest.	Partisan	Same as for question 1.	Keep four districts	No compelling reason has been provided to increase the number.	Keep it at 10 years	There's no good reason. If the county can't predict or envision certain things 10 years ahead, they should be left off the charter.	No	No	No	Another committee of likely non elected people deciding how others should talk. Non-Partisan	This role should not be governed by political parties. And, the first step in doing that is to remove the mandate of declaring your political affiliation.	Non-Partisan	it doesn't matter what the party of these people is. What matters is if they can represent the law.	Increase number of districts to five	honestly, I don't have an opinion on this, but its forcing me to answer. So, with that, I put 5, as there will be less ties in voting with 5.	Keep it at 10 years	we should not be changing our charter as often as every 5 years. it is meant as a long term plan, not a short term.	Yes	Yes	Yes	Unfortunately, we need oversight on ethics. This day and age, people in politics can no longer be trusted to be ethical on their own.	Both a position or office and an advisory board or commission. Non-Partisan	Councilors should focus on the job of governing the county and voters should be hiring the best person to do the job rather than a political party.	Non-Partisan	These are administrative positions hired to carry out state law. The partisan activity is through the legislative process and not the implementation process.	Increase number of districts to five	All Councilors are at an equal level in county government.	Change it to 5 years	Continued population growth and ever changing needs in county government currently require a more frequent review. If over time, the fairly new Charter and operations of the county become more settled then the Charter Review Commission in the future may want to extend the time for a review.	Yes	Yes			Both a position or office and an advisory board or commission.	
Partisan	Although non-partisan sounds better, and at one time that may have been, but if 'nonpartisan' that just means the average voter is going to know where they stand. People in the know WILL know - but otherwise there will be little indication of their real leanings until it's too late. And give more power to political insiders who may support 'nonpartisan' but really are supporting less transparency. Let people list independent if they want - but not list "I won't tell you".	Partisan	SEE ABOVE - Nonpartisan is not transparent. It does not make the POLITICS less partisan - just obscures the truth from the voters. Partisan	Particularly given today's polarized political climate, voters appreciate knowing whether a candidate's values align with their own.	Partisan	The more informed your electorate on the candidates, the better. Candidate statements are preferable but not always possible or convenient. The political perspectives of these candidates matter and should be readily available	Increase number of districts to five	As the population grows, additional representation is occasionally required. Diversity is also a point to be considered.	Change it to 5 years	Social change is happening at a fairly rapid pace and reviewing the charter once a decade seems a little too infrequent for a community that sensitive to all of its community members	Yes	Yes	Yes	At some point, I would support all 3, though not right away. I would then support the inclusion of an oversight and compliance office based upon recommendations from the independent ethics commission.	Both a position or office and an advisory board or commission.	I believe the position and office to be essential but the inclusion of an advisory board representing various communities within Vancouver would be ideal

Partisan	One can't hide behind a "non-partisan" label.	Non-Partisan	Agsin, without a partisan preference displayed, it is too easy to hide one's values from the public.	Increase number of districts to five	The fifth District (as opposed to an at-large chair) will help the council be more representative. Furthermore, the current process, where certain positions can run for the chair, without putting their position at risk, while others cannot is unjust. Both a position or office and an advisory board or commission.	Public and private working together makes sense.
Non-Partisan	They are making decisions that affect the quality of life in Clark County. When people vote along party lines, the cease to engage in critical thinking about issues which affect all of us.	Non-Partisan	For the same reason. If you followed the 2020 national elections and their aftermath, it should be clear that partisan governance is, most of the time, ineffective.	Increase number of districts to five	When I was born in 1938, most people lived in the country. Farms, by their nature, kept homes at a distance from one another. Today, we are a huge mix of urban, suburban, and rural lands, with a large population in each area. We need more voting districts to include the different places where we live and work.	Change it to 5 years	As above, we're growing too rapidly, and the world is changing too rapidly, to think that we'll see a stable decade ahead of us. We should have 3-5 year reviews during these times of change. Then, if things settle down, which is not a certainty, we can go back to reviewing at 10-year intervals.	Yes	Yes	Yes	Ethics is an important element of human interaction. We have very few ethics expectations. Ethics, and professional expectations, are not yet part of our governing structures, especially within our politically administered governmental organizations. Some schools are implementing units on ethics by juxtaposing issues with applicable legal codes. I've observed 4th graders doing a better job of using ethics to make recommendations on issues, than our elected officials are capable of. We can do better.	Both a position or office and an advisory board or commission.	We do very much need this. In time, an office within our government will probably suffice. For now, we need both the office, and advisory entity. The advisory entity should hold a fair number of seats for citizens. Our population is increasing, but the number of governmental staff has not kept up. At present, I think the office, and the board or commission, should be augmented by citizens' advisory committees for each component of increasing accountability or trust.

Partisan	Everyone tends to lean left or right, even folks that consider themselves centrists. Better that folks declare their party affiliation so voters have a better idea where they likely stand on issues rather than trying to make assumptions based on non-committal statements they've made.	Partisan	Same reason above. Positions being non-partisan gives cover for party operatives to try to sneak into important local offices. Non-Partisan	Clark County issues should not be divided into what party you are affiliated with. At the end of the day we all care about the county and when there is a party line it can be harder to see past our own agendas and make compromise.	Non-Partisan	Again when we affiliate and associate positions like the sheriff to a certain party very little progress can be made and more room for unethical behaviors can arise. Non-Partisan	Both parties are too extreme, remove the division and focus on the issues instead. Just because someone has a "D" next to their name doesn't necessarily mean they're a better person than someone that has a "R".	Non-Partisan	Treasurer? Really? We're focusing on which president or party someone that works with numbers is going for? We need people who are responsible and able to work in office, not people who will only vote based on party.	Increase number of districts to five	In my opinion, there should be no districts because there will never be someone to fully represent one. But now that we're on that topic, too little representation with 4 districts makes even more inequity and therefore should increase in order to listen to as many voices as possible.	Change it to 5 years	Nothing should be a decade long, circumstances change too often and even more now that our district is growing so fast. We need to be ahead of the curve.	Yes	Yes	Yes		Both a position or office and an advisory board or commission.	Both, one is not enough and causes too much divide especially if we keep the partisanship.
Non-Partisan	County governance should not be as divisive as national politics. Potholes on County roads don't have political parties.	Non-Partisan	I want to elect people because they have good ideas and values, not a D or an R next to their name. People are too ignorant to search info outside of their box. Non partisan may change it if only a nudge.	Increase number of districts to five	I lived in NE Hazel Dell which is connected to very rural parts in the north. I did not feel well represented by rural based values. Hazel Dell is a booming community.	Change it to 5 years	Yes. Provisions should be added that restrict edits to items such as the partisan/non-partisan decision.	Yes	Yes	Yes	Rednecks will claim bureaucracy, and it is. However, we need mechanisms to keep leaders accountable.	A position or office within Clark County government that drives, advises and coordinates Department of Equity & Inclusion efforts.	An advisory committee always turns into a jockey for who can say the most, spotlight, position to run for office, etc. A dedicated employee will implement plans with measurable outcomes. We need to move beyond rhetoric.
Partisan		Partisan		Increase number of districts to five		Change it to 5 years		Yes	Yes	Yes		Creation of an advisory board or commission.	
Non-Partisan	Any opportunity to take political power away from parties should be taken.	Non-Partisan	See answer to question 1. Additionally, there is no partisan aspect that these positions benefit from. I do not want partisan treasurers...I want treasurers who are good at math and accounting. Likewise with the other skill positions. Party affiliation is meaningless.	Keep four districts	Four seems ok. Too bad the survey doesn't have an "I don't know" option.	Keep it at 10 years		Yes	Yes	Yes		Both a position or office and an advisory board or commission.	Either/or. This is so important.
Partisan		Partisan		Keep four districts		Keep it at 10 years		Yes	No	No			None. Equity is a dog whistle for Marxist indoctrination. In America, EQUALITY in opportunity is the ideal. NOT equity in outcome.
Non-Partisan	The potential downside is that a resigning councilor could be replaced by someone from the opposite party. E.g. Temple Lentz could be replaced by David Madore should the majority of the remaining councilors want it so. However, at this level of government I'm not convinced there's any value in partisanship.	Non-Partisan	Partisanship isn't appropriate for these executive non-legislative roles.	Increase number of districts to five	It makes for (slightly) more granular representation on the council, and avoids questions like "must a councilor step down to run for chair." Clark County is large enough that it would even make sense to consider seven, nine, or even eleven districts. Currently, La Center and Woodland are lumped in with Salmon Creek, Yacolt is grouped with Camas, and they each have perspectives and concerns that are vastly different.	Change it to 5 years	I more frequent review, especially in the early stages of the charter, will allow a) for more adaptability to change, and b) for subsequent commissions to focus on a few key issues each time.	Yes	Yes	Yes	An Ethics Code is great, but needs enforcement. An internal ethics office could be helpful for staff-level review, but an independent commission allows for more neutral citizen oversight. And, this could be a clearinghouse commission to handle concerns across other county operations, e.g. Sheriff, Auditor, etc. Appropriate attention should be paid to how such an office/commission would actually enforce. For example, would they forward issues to the State Auditor's office?	Both a position or office and an advisory board or commission.	A position can simply be defunded or underfunded by the council or county manager. I've seen that happen in corporate settings, where we "check the box" but never empower that person to do the needed work. But, a paid staffer can focus on day-to-day issues within the organization. An independent commission would provide citizen oversight (always a good idea and consistent with the spirit of Washington State laws), and could also provide a staffer with needed support and backup.

Non-Partisan	I want our candidates to stand for more than just a party. I want them to stand for and explain the things they believe in want to accomplish.	Non-Partisan	Same as my answer for the first question. I want our candidates to stand for more than just a party. I want them to stand for and explain the things they believe in want to accomplish.	Increase number of districts to five	With nearly 500,000 people in Clark County I think it will help each district's residents have a more congenial and personal relationship with their council member.	Keep it at 10 years	Less thrashing in our government structure.	Yes	Yes		I think we should hold our representatives to high standards.	Both a position or office and an advisory board or commission.	With half a million people in Clark County, it's too easy to miss our under-served and minority communities when policy is being discussed. An equity & inclusion officer taking direction from an advisory board will be in a better position to advise our county council and management and push needed changes forward as decisions are made.
Non-Partisan	Partisan doesn't seem to work very well these days.	Non-Partisan	What difference does it really make? Partisan is a lost cause these days. Vote for the candidate who has what you consider the better ideas on issues that concern you rather than those of the party he/she might represent.	Keep four districts		Change it to 5 years		Yes	Yes	Yes		Both a position or office and an advisory board or commission.	The more eyes and ears on the going on's in local government the better.
Partisan	Having the political party displayed on the ballot gives low information voters more information on the candidates. A lot of people don't have the time to research every candidate for every race on their ballot. They almost all have understanding of the policies supported by political parties though and that is useful information for them in deciding who to vote for. I don't think it matters as much for the county executive offices though. Those could be non-partisan.	Non-Partisan	For the county executive offices I don't think it matters much either way. Those offices are more about governance and less about policy. Plus I don't believe the majority of voters would have any idea about what would make one candidate for Auditor, Assessor, Clerk or Treasurer better than any other candidate. And political party doesn't really help illuminate that information.	Increase number of districts to five	Right now whomever is serving in districts 3 and 4 can run for chair and not worry about losing their seat. Even if they lose that election they can retain their seat. This presents a big disadvantage for any candidates in districts 1 and 2. Having the council elect the chair would eliminate this issue. Also increasing to five districts would increase representation. The issues facing Camas and Washougal are probably very different from the issues faces Yacolt. Having five districts would allow more areas of the county to have a distinct voice on the council.	Change it to 5 years	Ten years is too long of a time to wait to review the charter in such a fast growing area.	Yes	Yes	Yes	Ethics can only really be enforced with independent oversight. Non-Partisan	98% of decisions made by county council are not partisan or should not be. Partisan only makes things more divisive. We need councilors looking for solutions, not fighting on partisan lines.	Non-Partisan	Most of these positions are administrative and should have nothing to do with partisan politics.	Keep four districts	I believe chair should be elected by all the voters of the county.		In the early years five years apart might be helpful but in the long run probably not necessary. Non-Partisan	I'd prefer them all to be non-partisan .... but especially the executive elected positions.	Non-Partisan	It will take time to escape the partisanship of elections but, over time, i believe there will be more focus on issues than party preference.	Increase number of districts to five	More balanced districts -- especially if the 5 then elect their own Chair rather than a separate county wide elected chair.	Change it to 5 years		Yes	Yes	No	I believe the current code should be moved into the Charter. It is comprehensive and not limited to typical things like bribery. Right now Council could eliminate the Code by Ordinance - it should be harder than that! I'd vote against a separate ethics officer primarily because of cost - i want this section to pass. I want the process for appointing ethics commission members spelled out. I also want a provision that the ethics commission will have adequate resources to investigate complaints.	Creation of an advisory board or commission.	Again we need a Commission - but i also know that cost will be an issue. Partisan	One of the two major parties have moved to the extreme. Having a party label helps voters determine a candidates overall values. Too many voters do not do their due diligence in researching a candidate's position on issues. This is unfortunate but true. Having a party at the very least helps the voter in the broadest terms.
