EXHIBIT 'A'

RE: Scope of Work Proposal -Clark County- 149th St Complex- Warehouse Bldg. "A1" TI Project

Thank you for the opportunity to provide this proposal. We are flexible to meet your exact needs and provide whatever level of service you require. This proposal summarizes and documents our scope of services and understanding to provide limited professional services to prepare a building permit submittal/ bid drawing set and specifications for limited tenant improvements (TI) project at existing Warehouse A1.

Project Scope Summary/ Schedule:

We understand the project consists of proposed tenant improvements limited to the addition of a new vestibule and door assemblies at Warehouse Building A1, as indicated in attached Conceptual Drawing A2 that was prepared during the feasibility study completed last year. (See attached Exhibit Drawing for reference.)

It is understood that the Building Dept. will require the overall Warehouse Building A1 floor plan to be prepared to include a basic building code summary and submitted as part of the TI permit review/approval process, but not any other building evaluations and/or upgrades beyond this identified scope of work. If other building evaluations and/or upgrades are required, these will be additional services. We will also prepare reference technical specifications to include with the TI permit submittal/ bid package. We understand the County will prepare contract and bidding requirements (front end) and the project will be distributed to prospective bidders using the County's Small Works Roster. The Mechanical/ Electrical scope of services will be limited to notes added to the architectural drawings and technical specifications prepared by MKE & Associates, Inc. DLC will coordinate directly with MKE & Associates as part of our design services.

In addition to the preparation of the building permit submittal/ bid package, our scope also includes limited professional services during the bidding and construction phases of the project for DLC Architecture. MKE & Associates does not have any scope included for bid and construction phases of the project, so if required these will be additional services to this scope of work. We are prepared to begin work upon approval of our agreement and will proceed diligently to complete the following tasks: information gathering, preparation of existing condition drawing, begin coordinating with Consultants to prepare an in-progress set of drawings for review, and to begin coordination with you and the appropriate County Staff.

Scope of Work/ Design Fee:

Our proposed Scope of Work and Design Fees are outlined and summarized on the following pages. It is understood that the County's Standard Professional Services Contract Form will be used for this agreement with our Scope of Work Summary/ Letter and Exhibit will be attached to the Contract Form. Please call me with any questions or if you need additional information. We are excited at the opportunity to provide services for this project and look forward to working with you and your team.
