The budgeted amounts for "Title XIX Match" and "Direct Funding" within a single revenue source for a statement of work may be reallocated by the County without formal contract modification so long as the budgeted amount for "Total Revenue Source" does not change. The County shall notify the Contractor in writing of any changes to the allocation. Title XIX funding shall be maximized as a primary funding source whenever possible.

continuing treatment, the fee requirement may be waived by the subcontractor.

- A. Payment to the Contractor will be processed within twenty (20) days of the receipt of a complete and accurate invoice. Invoices shall be submitted along with all required written reports and shall include the following:

1. The month/year for which payment is requested;
  2. An invoice number;
  3. The Contract number and the Statement of Work number;
  4. The name and address of the Contractor;
  5. A payment request form;
  6. The *TARGET* verification report attached hereto as Exhibit A;

      - i. Cost Allocation Plan that defines how direct, shared, and administrative costs are allocated; or
      - ii. A Cost Allocation methodology that defines how direct, shared, and administrative costs are allocated.
  2. For services that are also funded by a third party, the Contractor shall provide a detailed cost itemization by cost center and funding source.

Detail shall identify which services or work was funded by the County and by other parties.

- C. For Statements of Work paid on a fee-for-service basis, the Contractor shall be reimbursed based upon the total units of service delivered for each Statement of Work modality less any fees charged to patients. Fees shall be based on the Clark County Service Rates included as exhibits to the Contract and/or any other fees specified in the Statement of Work. Updates to the service rates, an effective date included, will be provided to the Contractor by mail or email and will not require a formal modification. The billing request documentation shall clearly support the basis for the amount requested, i.e. a schedule that identifies the applicable rate(s) times the unit(s) of service for each service in each statement of work and equals the amount requested for payment. The Contractor will maintain records to justify the fees being claimed. Costs covered by fee-for-service payment shall not be submitted for cost reimbursement. The Contractor shall attach a copy of the Medicaid payment system denial to the monthly billing form to document the denial.

- G. The Contractor shall complete a calendar year closeout process by January 25<sup>th</sup> of each year billing for all eligible expenses or funds earned during that previous calendar year. This is necessary because the County's fiscal year is the calendar year, and the County must close its records for the previous calendar year in January. The Contractor may submit payment requests at any point

during the Contract period. However, at a minimum, payment requests must be processed for costs incurred during the calendar year in which they occur. Any payment request received after January 25<sup>th</sup> will be subject to a late processing surcharge equal to the County's actual cost of processing the request.

- H. The County shall reimburse the Contractor based upon the DSHS-approved Service Rates shown in Exhibit B.
- I. The Contractor agrees to allow the County to make adjustments to the individual budget lines of this Contract when necessary and in the interests of both parties. In the event that the County needs to adjust the stated budget amounts specified in the Statements of Work of this Contract, the Contractor grants the County the right to unilaterally modify said budget lines by issuing a contract amendment that, provided the total contract amount remains unchanged, will not require the signature of the Contractor.

- e. **Paper documents.** Any paper records must be protected by storing the records in a Secured Area which is only accessible to authorized personnel. When not in use, such records must be stored in a locked container, such as a file cabinet, locking drawer, or safe, to which only authorized persons have access.
- f. **Remote Access.** Access to and use of the Data over the State Governmental Network (SGN) or Secure Access Washington (SAW) will be controlled by DSHS staff who will issue authentication credentials (e.g. a Unique User ID and Hardened Password) to Authorized Users on Contractor staff. Contractor will notify DSHS staff immediately whenever an Authorized User in possession of such credentials is terminated or otherwise leaves the employ of the Contractor, and whenever an Authorized User's duties change such that the Authorized User no longer requires access to perform work for this Contract.
- g. **Data storage on portable devices or media.**
  - (1) Except where otherwise specified herein, DSHS Data shall not be stored by the Contractor on portable devices or media unless specifically authorized within the terms and conditions of the Contract. If so authorized, the Data shall be given the following protections:
    - (a) Encrypt the Data with a key length of at least 128 bits

- (b) Control access to devices with a Unique User ID and Hardened Password or stronger authentication method such as a physical token or biometrics.
- (c) Manually lock devices whenever they are left unattended and set devices to lock automatically after a period of inactivity, if this feature is available. Maximum period of inactivity is 20 minutes.

Physically secure the portable device(s) and/or media by:

- (d) Keeping them in locked storage when not in use
  - (e) Using check-in/check-out procedures when they are shared, and
  - (f) Taking frequent inventories
- (2) When being transported outside of a Secured Area, portable devices and media with DSHS Confidential Information must be under the physical control of Contractor staff with authorization to access the Data.
  - (3) Portable devices include, but are not limited to; smart phones, tablets, flash memory devices (e.g. USB flash drives, personal media players), portable hard disks, and laptop/notebook/netbook computers if those computers may be transported outside of a Secured Area.
  - (4) Portable media includes, but is not limited to; optical media (e.g. CDs, DVDs), magnetic media (e.g. floppy disks, tape), or flash media (e.g. CompactFlash, SD, MMC).

**h. Data stored for backup purposes.**

- (1) DSHS data may be stored on portable media as part of a Contractor's existing, documented backup process for business continuity or disaster recovery purposes. Such storage is authorized until such time as that media would be reused during the course of normal backup operations. If backup media is retired while DSHS Confidential Information still exists upon it, such media will be destroyed at that time in accordance with the disposition requirements in Section 5. Data Disposition
- (2) DSHS Data may be stored on non-portable media (e.g. Storage Area Network drives, virtual media, etc.) as part of a Contractor's existing, documented backup process for business continuity or disaster recovery purposes. If so, such media will be protected as otherwise described in this exhibit. If this media is retired while DSHS Confidential Information still exists upon it, the data will be destroyed at that time in accordance with the disposition requirements in Section 5. Data Disposition.

**4. Data Segregation.**

- a. DSHS Data must be segregated or otherwise distinguishable from non-DSHS data. This is to ensure that when no longer needed by the Contractor, all DSHS Data can

be identified for return or destruction. It also aids in determining whether DSHS Data has or may have been compromised in the event of a security breach. As such, one or more of the following methods will be used for data segregation.

- b. DSHS Data will be kept on media (e.g. hard disk, optical disc, tape, etc.) which will contain no non-DSHS data. And/or,
- c. DSHS Data will be stored in a logical container on electronic media, such as a partition or folder dedicated to DSHS Data. And/or,
- d. DSHS Data will be stored in a database which will contain no non-DSHS data. And/or,
- e. DSHS Data will be stored within a database and will be distinguishable from non-DSHS data by the value of a specific field or fields within database records.
- f. When stored as physical paper documents, DSHS Data will be physically segregated from non- DSHS data in a drawer, folder, or other container.
- g. When it is not feasible or practical to segregate DSHS Data from non-DSHS data, then both the DSHS Data and the non-DSHS data with which it is commingled must be protected as described in this exhibit.

**5. Data Disposition.** When the contracted work has been completed or when no longer needed, except as noted in Section 3. Protection of Data b. Network Server Disks above, Data shall be returned to DSHS or destroyed. Media on which Data may be stored and associated acceptable methods of destruction are as follows:

<b>DATE STORED ON:</b>	<b>WILL BE DESTROYED BY:</b>
Server or workstation hard disks, or	Using a “wipe” utility which will overwrite the Data at least three (3) times using either random or single character data, or
Removable media (e.g. floppies, USB flash drives, portable hard disks) excluding optical discs	Degaussing sufficiently to ensure that the Data cannot be reconstructed, or  Physically destroying the disk
Paper documents with sensitive or Confidential Information	Recycling through a contracted firm provided the contract with the recycler assures that the confidentiality of Data will be protected.

Paper documents containing Confidential Information requiring special handling (e.g. protected health information)	On-site shredding, pulping, or incineration
Optical discs (e.g. CDs or DVDs)	Incineration, shredding, or completely defacing the readable surface with a coarse abrasive
Magnetic tape	Degaussing, incinerating or crosscut shredding

6. **Notification of Compromise or Potential Compromise.** The compromise or potential compromise of DSHS shared Data must be reported to the DSHS Contact designated in the Contract within one (1) business day of discovery. If no DSHS Contact is designated in the Contract, then the notification must be reported to the DSHS Privacy Officer at [dshsprivacyofficer@dshs.wa.gov](mailto:dshsprivacyofficer@dshs.wa.gov). Contractor must also take actions to mitigate the risk of loss and comply with any notification or other requirements imposed by law or DSHS.
7. **Data shared with Subcontractors.** If DSHS Data provided under this Contract is to be shared with a subcontractor, the Contract with the subcontractor must include all of the data security provisions within this Contract and within any amendments, attachments, or exhibits within this Contract. If the Contractor cannot protect the Data as articulated within this Contract, then the contract with the sub- Contractor must be submitted to the DSHS Contact specified for this contract for review and approval.
