Park Advisory Board Park Standards Subcommittee

Pros Plan takeaways

1. Define and include pocket parks:
   - Beginning draft shared on 10/29/2020
   - Input from PAB received –seeking additional input today
   - Review update on 11/19/20

2. Define and include linear parks:
   - Beginning draft shared on 10/29/2020
   - Input from PAB received –seeking additional input today
   - Review update on 11/19/20

3. Add more inclusive languages to the plan in terms of what the county has to offer those with disabilities and what we can do a better job of going forward:
   - Clark County does not have a park assessment plan in place to determine the number of playgrounds and amenities that are accessible for individuals of varying abilities.
   - This is within the Goals and Objectives – specifically in Goal 6.

4. Define goals for our parks and trails that draw people of all ages, abilities, and cultures to our park system:
   - This is also included within the Goals and Objectives, Goal 2 and Goal 6 specifically.

5. Work to get more information regarding dog parks. Is there a national standard?
   - Per Conservation Technix: We will include reference material and some best practices as an appendix. This has not yet been compiled, but we have supporting documentation.

6. Potentially include schools as a % of park property during accessible times when they are open to the public:
   - We did concur to keep school parks' acreages at the same level as 2015 PROS plan.
   - That included specific parks that the county had been involved in- either as development agreements or maintenance contributions.
   - School park acreage would be very limited since many schools program their fields for after-school use so the public could only have access to the actual envelop of playground area.

7. Reduce PIFS for developers building affordable housing- define that metric: this is a tough one.
   - PIF related tasks are held for 2021

8. Allow for a credit system for developers - what do other jurisdictions do? Can we see 3 examples?
   - PIF related tasks are held for 2021
