Content for Tabs 1 – 13

Attachment D – Proposal Response Tabs is a Word document that provides detailed instructions and requirements for the Proposer as it relates to the documents to be submitted as their RFP response and Services required for the Project.

Proposers are instructed to organize Proposals in a tabbed format and to insert the completed Tab forms (**Attachment D – Proposal Response Tabs**) in the corresponding Tabs as a part of their response to the Proposal. In addition to the information captured through the questions and tables in **Attachment D – Proposal Response Tabs**, Proposers are requested to provide complementary narrative information, diagrams, and images to help substantiate and support their proposal response to each Tab section.

Attachment E – Functional and Technical Requirements/Capabilities is an Excel document that provides detailed requirements and capabilities related to software features and functions, as well as potential interfaces and data conversion requirements.

a) Tabs 1 – 12

These tabs are to include the Proposers response as detailed in **Attachment D – Proposal Response Tabs**, including any supplemental attachments or documents identified in **Attachment D – Proposal Response Tabs**. Proposers are directed to **Attachment D – Proposal Response Tabs**, which includes forms, tables, and questions that are to be completed by the Proposer and inserted into each applicable tab of the RFP response (Tab 1 – 12).

b) Tab 13

This tab is to include Proposer's response as detailed in **Attachment E – Functional and Technical Requirements/Capabilities**, which is an Excel document to be filled out by the Proposer. Proposers are required to use the following legend for completing **Attachment E – Functional and Technical Requirements/Capabilities**.

When providing responses to the requirements in **Attachment E – Functional and Technical Requirements/Capabilities**, Proposer shall use the response indicators contained in the following table.

Proposers are instructed to enter only one response indicator in response to each requirement. Responses to an individual requirement that contain more than one indicator (e.g., C/T) will be treated as a response of "N" feature/function not provided.

If a Proposer is not proposing on certain functionality, a response of "No Bid" shall be provided for all applicable areas. A response of "No Bid" should not be used as a replacement for an "N" response. Requirements submitted without a response will be treated as a response of "N" feature/function not provided.

Table: Requirements Response Indicators

Indicator	Definition	Instruction
S	Standard: Feature/Function is included in the current software release and will be implemented by the planned phase go-live date as part of the proposal from Vendors in accordance with agreed-upon configuration planning with the CCPH.	Proposers are encouraged, but not required, to provide additional information in the Comments column to further demonstrate the system's ability to meet the requirement.
F	Future: Feature/Function will be available in a future software release available to the CCPH by January 1, 2023, at which point it will be implemented in accordance with agreed-upon configuration planning with the CCPH.	If a response indicator of "F" is provided for a requirement that will be met in a future software release, the Proposer shall indicate the planned release version, as well as the time the release will be generally available.
C	Customization: Feature/Function is not included in the current software release, and is not planned to be a part of a future software release. However, this feature could be provided with custom modifications . All related customization costs should be indicated in Attachment G – Cost Worksheet.	If a response indicator of "C" is provided for a requirement that will be met through a custom modification, the Proposer shall indicate the cost of such a modification.
T	Third Party: Feature/Function is not included in the current software release, and is not planned to be a part of a future software release. However, this feature could be provided with integration with a third-party system . This system should be specified.	If a response indicator of "T" is provided for a requirement that will be met by integration with a third-party system, the Proposer shall identify this third-party system and include a cost proposal to secure this system. If the third-party system is a part of the proposal, the third-party shall respond to the appropriate requirements with a clear notation that the responses are provided by the third-party.
