

Wetland Restoration 2025

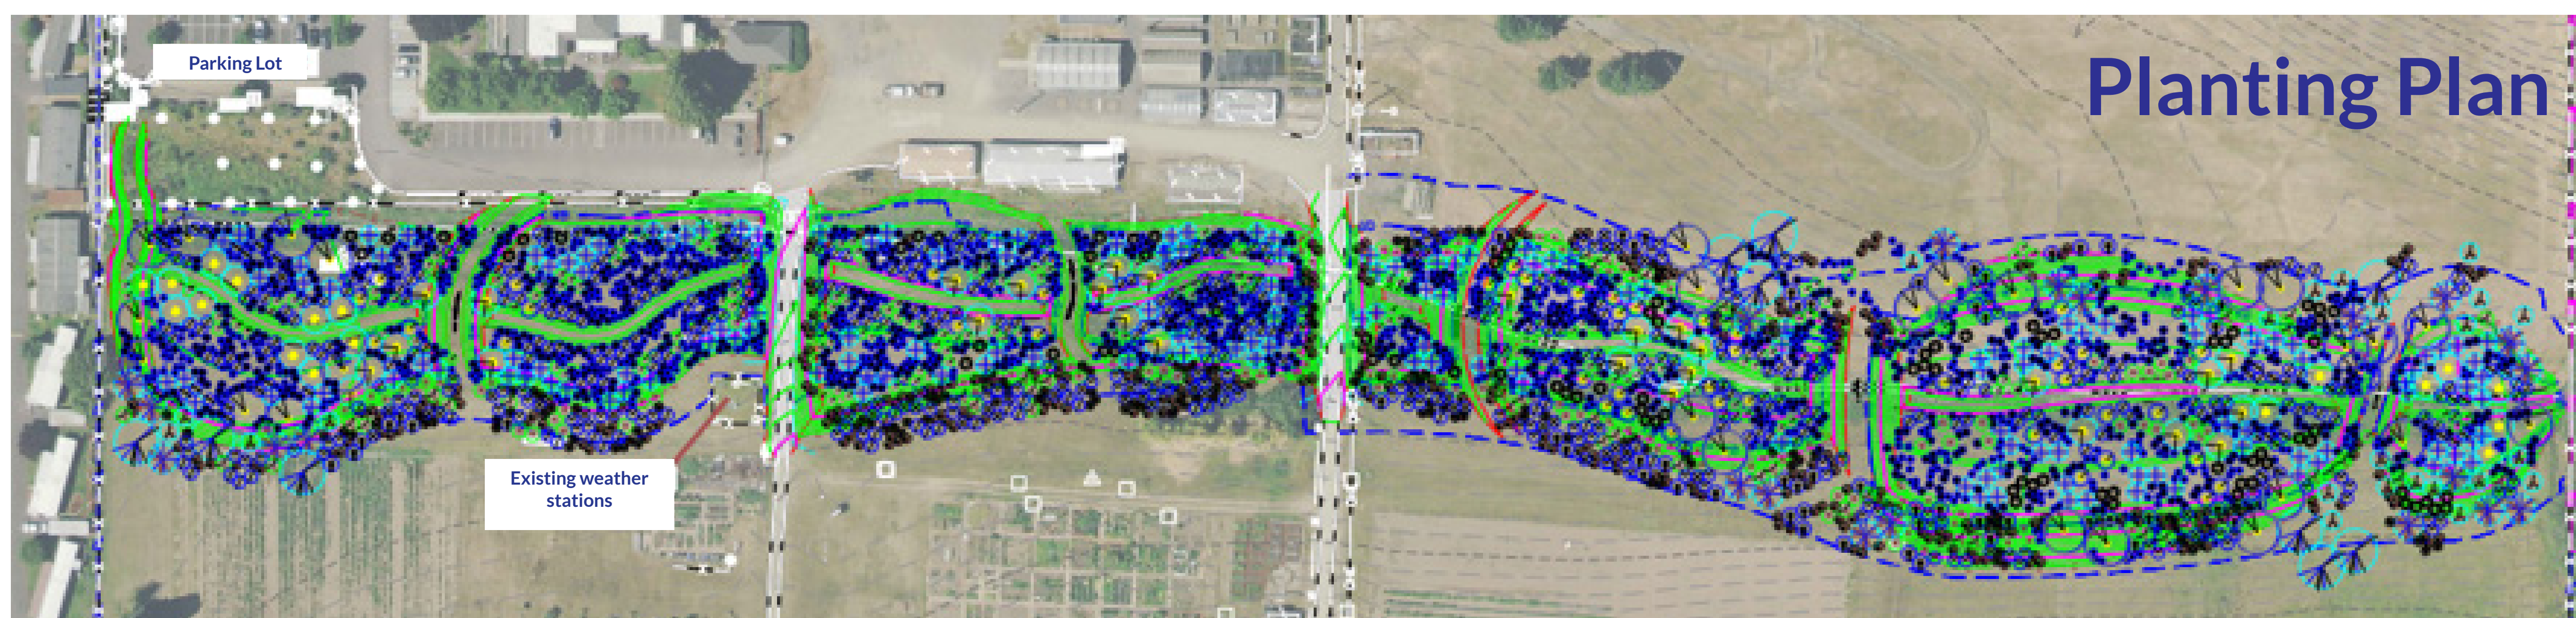

What's happening?

The Cougar Creek wetland that runs through Heritage Farm is being restored closer to its original pre-settlement state. This will lead to improved water temperatures in Salmon Creek, a fishbearing stream!

What's in the design?

Design Drawing

When and how long?

Start date: June 2025

Completion date: December 2025

Long-term maintenance period: 8-years

What can I expect when the project is done?

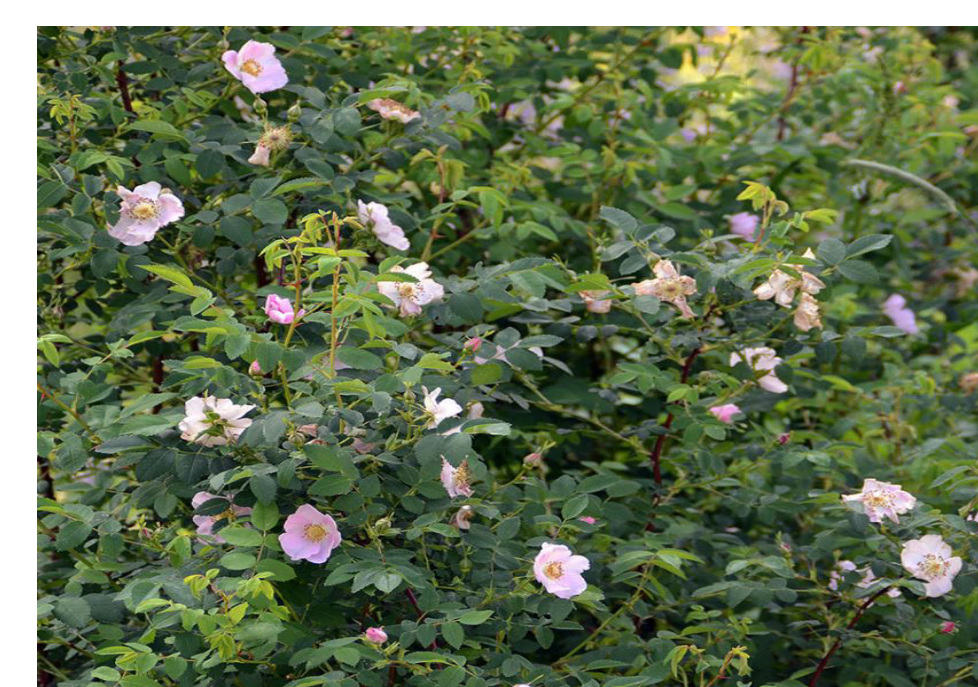

Example after planting

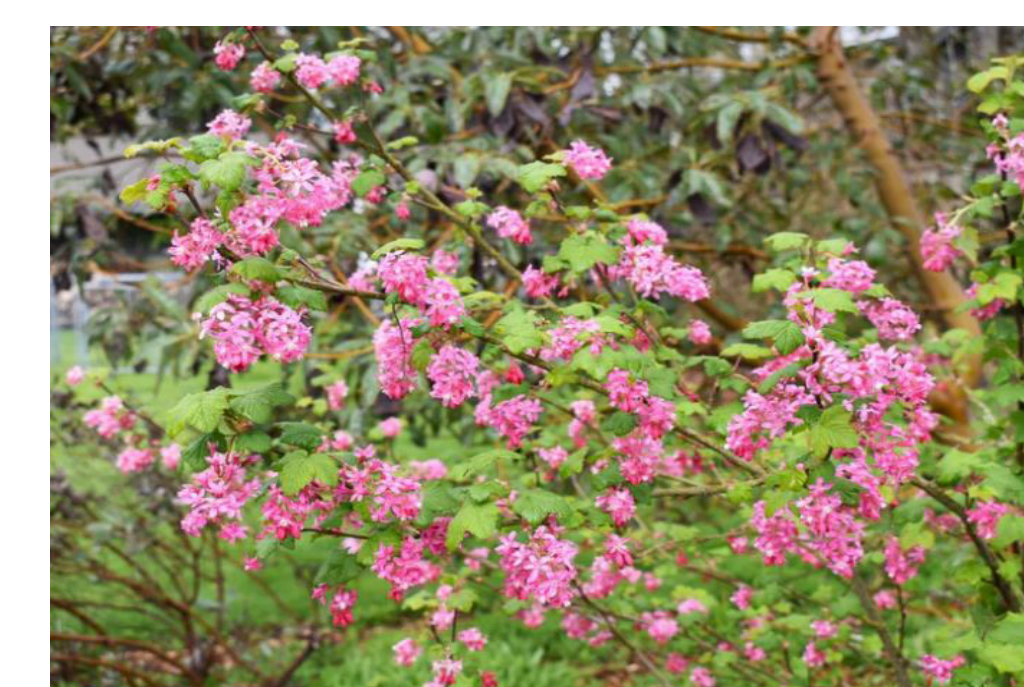

Four years later

What types of plants?

Nootka rose

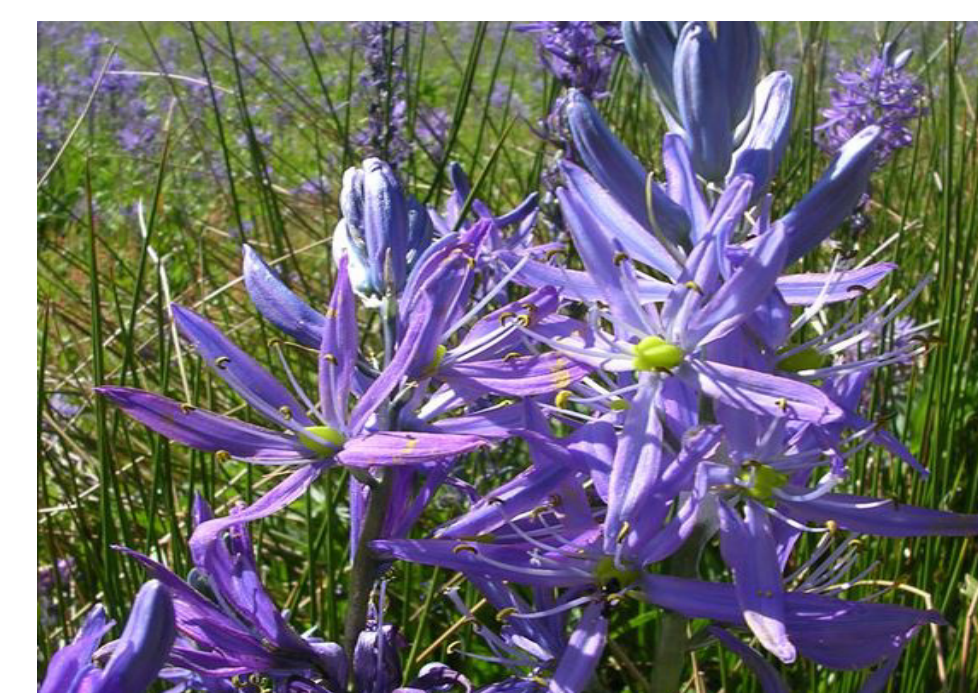

Red flowering current

Douglas spirea

Pacific willow

Small camas

Western serviceberry
