BMP C233-A Bio-filter Bags – Sediment Barrier

v. 1/7/16

Working together. Securing your safety. Protecting your investment.

Purpose and Description

Bio-filter bags or wattles may be used as a sediment barrier and alternative to silt fence along sidewalks on single-family residential construction.

Conditions of Use

- Can only be used on single-family residential construction sites.
- Can only be placed after installation of the sidewalk.

Design Criteria

- Install bio-filter bags or wattles parallel to the sidewalk.
- Overlap bags or wattles by at least 6 inches.
- Stake each bag using two 1"x2" wood stakes.
