Washington Traumatic Brain Injury Resource Coordination Services

a demonstration project to provide statewide resource and service coordination for traumatic brain injury survivors and those advocating on their behalf—usually family members or unpaid caregivers.

Funded by the Washington TBI Fund as administered by the Department of Health and Human Services (DSHS). Also supported by in-kind contributions from members of the Washington Adult Day Services Association and its community partners.

Washington Adult Day Services Association

To apply:

Call the toll-free WA TBI Helpline:
1-877-824-1766

1. To improve the quality of life for persons with traumatic brain injury (TBI) and their families.
2. To assist TBI survivors and their families with "filling in the gaps."

To apply: call toll-free 1-877-824-1766

Carla-Jo Whitson, MSW
360-991-4928
**Goals**

1. To improve the quality of life for persons with traumatic brain injury (TBI) and their family members.

2. To assist TBI survivors and their families with "filling in the gaps."

**Resource Coordinators**

1. Work face-to-face with survivors and their families to assess their current resources and needs.
2. Develop a comprehensive person-centered plan of care.
3. Provide referrals to available resources and services.
4. Coordinate resources and services for individual client advocacy.
5. Bridge gaps in the survivor's and/or family's service delivery system.
6. Assure sustainability for the survivor’s and family’s future access to community resources.
7. Master-level social workers working with a consulting psychologist and our partners at the TBI Helpline (40 hours per week, Master and PhD-level counselors trained in TBI issues).

**Criteria for Participation**

Participant:

1. was injured or diagnosed from the referral source with a traumatic brain injury within the past five (5) years;

2. resides in the State of Washington;

3. has a recognized need that would benefit from increased links to resources and support;

4. has no substance abuse problems that would interfere with participation;

5. is not currently participating in a similar TBI management or TBI study program;

6. Participant or designated representative agrees to share protected health information and have or have the ability to participate in forming goals.
