Preserving a lasting legacy

Clark County’s diverse natural landscape consists of broad river valleys, narrow creek canyons, wetlands, lakes, riparian zones, forests, mountains, meadows, foothills and farms. Clark County’s Legacy Lands Program (Conservation Futures Program) is managed by Environmental Services. This program was instituted in October 1985, when the Board of County Commissioners adopted a property tax levy of 6.25 cents per $1,000 of valuation to protect open space from threats such as urban development and habitat degradation. Protected lands provide a vital green infrastructure that connects our community, protects our water and air, preserves corridors for wildlife, and provides recreational opportunities. The program’s primary county revenue source is the Conservation Futures levy. It has supported more than 45 distinct acquisitions. Local revenues combined with grants and donations purchased these scenic properties.

In addition, acquisitions occurred through the state Department of Natural Resources Trust Land Transfer Program and privately owned land donations. The county also coordinates its acquisitions with other land conservation entities such as the U.S. Fish and Wildlife Service, Washington State Department of Fish and Wildlife, cities, towns and private land trusts.

Find out more about the program and properties at www.clark.wa.gov/legacylands.

Stewardship and volunteering

You can play an important role in maximizing the natural value of lands through resource protection, restoration and site stewardship. Volunteer to work with our partner agencies to remove invasive species and litter, plant native trees and shrubs, repair trails and maintain these beautiful sites.
Wildlife viewing
As you walk through forest lands, listen to the tree canopy for bird calls from ravens, owls, warblers and wrens. All sorts of animals wander the properties, from black bear, deer and squirrels, to newts and frogs. When near a river, it is easy to spot American bald eagles or osprey but keep your eyes open for more elusive critters such as otters and beavers. Make sure to bring your binoculars.

Waterfalls and rivers
With over eight major river systems covering more than 1,700 miles, there is scenic beauty throughout the county. From babbling urban streams to gushing forested rivers, Clark County has an exceptional variety of waterways. Local urban streams offer beauty along greenways and habitat for wildlife. Our rivers have iconic views with lots of rocky rapids, dramatic waterfalls and serene pools.

Natural areas, parks and trails
Conservation properties are great for community recreation. Put on your hiking boots, saddle up your horse or pack a picnic. Plan an adventure and visit over 25 properties that are open for exploring. Many properties are close to home if you only have an hour, while others are great trips for all day adventures. Many conservation properties include amenities such as parking, trails and interpretive signs.

Fishing and boating
Clark County’s river systems include more than 30 miles of water trails along Lake River and the Lewis. Boat ramps throughout the county allow easy launching for kayaks, canoes and drift boats. Float downstream to enjoy the view, look for wildlife or try your hand at catching steelhead trout or salmon. Protection of these rivers is critical to the health of waterways and fish that call them home.
Explore Legacy Lands

With over 5,000 acres of conservation and natural areas in public ownership, we have wonderful opportunities to explore the great outdoors. The properties fall into two categories:

PASSIVE RECREATION. Enjoy hiking, fishing, birding and boating in beautiful environments that also provide rich habitats for fish and wildlife.

CONSERVATION AREAS. Conservation properties protect critical areas such as river corridors that are vital to the health of protected fish species such as salmon and trout. While not used for recreation, there are volunteer and stewardship opportunities such as native planting and invasive species removal in these areas.

OPEN FOR PASSIVE RECREATION
2. Haapa Boat Launch
5. La Center Bottoms Wetlands
7. Lower Daybreak Park
9. Lucia Falls (North)

Enjoy your visit!

- Visit [www.clark.wa.gov/legacylands](http://www.clark.wa.gov/legacylands) for links to trail maps, access directions and site specific information.
- Natural areas are open from 7 a.m. to Dusk.
- Plan ahead for your visit. Sites may have limited parking, trash cans, water or restrooms.
- Trails are typically natural surface with easy to moderate slopes and may include trip hazards.
- Pets must be on leashes at all times and owners are required to remove pet waste from the site.
- Camping and fires are not allowed on properties except at designated sites with proper permitting.

<br>**Leashed dogs are welcome on trails**

1. On-street parking only
2. Restrooms open for permitted events only
3. Available only through youth camp
4. Camping by permit only

**Haapa Boat Launch to East Fork Lewis River**
- [Paved boat launch](http://www.clark.wa.gov/legacylands) - flat bottom boat less than 20 feet length with access to North Fork Lewis River
