

## CLARK COUNTY

### CAMP BONNEVILLE FPA #2933053 – 2019 FOREST HEALTH THINNING

#### QUESTIONS and ANSWERS

UPDATED: July 8, 2019

	QUESTION	ANSWER
1.	Are we buying a delivered product OR are we buying it all and logging it ourselves?	You would be buying a delivered product. We are going to put a bid out for logging once this auction closes.
2.	Who is paying the harvest taxes on this job	The successful bidder shall be financially responsible for payment of the state forest excise tax.
3.	Can you send me the “the Bill of Sale and Contract for Forest Products” as noted in the prospectus for the 2019 Thinning project sort sale.	We would issue the Bill of Sale and contract to the successful bidder for the purchase of forest products, the purchase will be subject to the terms and conditions of the Purchaser’s Log Purchase Order (contract). This auction sale includes only the delivered log and does not include any work to harvest or haul the log. That work will occur under a separate contract. There is no breakdown of volume for this sale, as no estimate of the number of logs meeting each grade has been developed. This auction sale simply requests the highest and best price each mill can provide for a delivered log for each grade specified. The county cannot guarantee the amount of timber available for each grade.
