## Recreational Water Safety Recreational Water Feature Questionnaire

---

### GENERAL RECREATIONAL WATER FEATURE INFORMATION:

- New                       Modification                       Addition  
 Outdoor                       Indoor

### WALKING SURFACE:

Construction material: \_\_\_\_\_  
Deck drainage method: \_\_\_\_\_

Type of non-slip finish provided: \_\_\_\_\_  
Rate of slope for deck: \_\_\_\_\_

### INLETS AND OUTLETS:

**NOTE: CCPH will be requiring images of the pipes before they are covered.**

*Check if the following requirements are met.*

- Drains prevent entrapment.  
 Drain covers require a tool to remove and do not have openings that allow the passage of a 1.5 inch sphere.  
 The pressure, velocity and total force of the inlets will not create a physical hazard.  
 The make-up water is protected from backflow.

### EMERGENCY EQUIPMENT AND CONTROL OF BATHERS:

*Required:*

- Rule signs meeting minimum requirements (*Signage requirements can be provided upon request*)

*Recommended:*

- Phone or emergency call box  
 First aid kit  
 An emergency blanket
