

Recreational Water Safety Spa Questionnaire

If more than one spa is included in the project, complete one questionnaire for each spa.

GENERAL SPA INFORMATION:

- New Modification Addition
 Outdoor Indoor

Dimensions: length _____ width _____

Depth range: shallow _____ deep _____

Surface area ≤ 5 ft. deep: _____ square feet

Surface area > 5 ft. deep: _____ square feet

Spa surface construction material: _____

Color of the spa surface: _____

WALKING SURFACE:

Construction material: _____

Type of non-slip finish provided: _____

Deck drainage method: _____

Rate of slope for deck: _____

Are depth markings (with "feet" or "ft") provided on the deck AND the vertical walls? Yes No

STEPS:

For each set of stairs note on the following:

Step riser height in inches _____ " Step riser tread in inches _____ " Surface area of first step _____ "

Check if the following requirements are met.

- The steps are uniform.
 The stairs are marked in a contrasting color to ensure visibility.

INLETS AND OUTLETS:

CCPH will be requiring images of the main drain pipes before they are covered.

Check if the following requirements are met.

- The inlets are submerged.
 The skimmers are installed with equalizer lines or an alternative method to prevent air lock.
 Two or more hydraulically balanced main drains are provided with a minimum spacing of 3 feet.
 All main drain pipes are the same diameter.
 Jet suction points are hydraulically balanced and do not create an entrapment risk.
 The make-up water is protected from backflow.

EMERGENCY EQUIPMENT AND CONTROL OF BATHERS:

Check that the following emergency equipment will be provided and accessible during all hours the spa is open:

For all spa facilities:

- Spa rule signs meeting minimum requirements (*Signage requirements can be provided upon request*)
- Phone or emergency call box
- First aid kit
- An emergency blanket
- Emergency shut-off switch within 25 feet of the spa that shuts off all pumps and has an audible alarm

COMMENTS CONCERNING FACILITY:
