Sewer Availability Request Form

NOTE: This determination represents the conditions as of the date of the request.

Request Date _____ Requestor's Name _____ Phone _____

I would like to know if sewer service is available for the following property:

Parcel # _____ Address _____ City _____

The following has been determined by : _____
(Purveyor Name)

1. The property is **NOT** within the sewer service area. Sewer service from this purveyor is **NOT** available.
2. A sewer main is over 200 feet away from the property. Sewer is **NOT** available for immediate connection. A **Request for Utility Service** form will allow us to determine what would be required to connect your property to sewer.
3. Sewer **IS** available for immediate connection (see attached map). A sewer main abuts the property.
4. A sewer main is located within 200 feet of your property. To determine the requirements necessary for sewer connection, a **Request for Utility Service** form must be completed*.
 - 4A) Will connection to sewer require a sewer main extension? Yes No Unknown**
 If Yes, please provide an *estimate* of extension length _____
 - 4B) Are there obvious constraints present that can complicate sewer connection?
 (e.g. depth, easement requirements, physical obstruction, etc.) Yes No Unknown**

Completed by _____ Date _____
Sewer Purveyor Representative

* Clark County Public Health will **NOT** process a septic system permit until the **Request for Utility Service** form is completed and availability is determined.

Septic system review services from Clark County Public Health will require completion of the **Request for Utility Services form for determination of sewer availability.

FOR CLARK COUNTY PUBLIC HEALTH USE ONLY

CCPH to complete this section for system repairs/replacement components proposed within an Urban Growth Boundary

1. Is the OSS within a ZOC? Yes No
2. Client advised to contact the sewer purveyor regarding their options for sewer connection? Yes No
3. Estimated cost for connection to public sewer service: _____
 Estimate includes: tank abandonment connection fees engineering construction
4. Estimated cost for system repair/replacement component: _____
 Estimate includes: tank abandonment CCPH fees design costs installation costs
