HEADS UP

There's an upcoming project in your area. *Here's what you need to know.*

MAY 2018

HIGHWAY 99 SIDEWALK

From Northeast 122nd Street to Northeast 129th Street

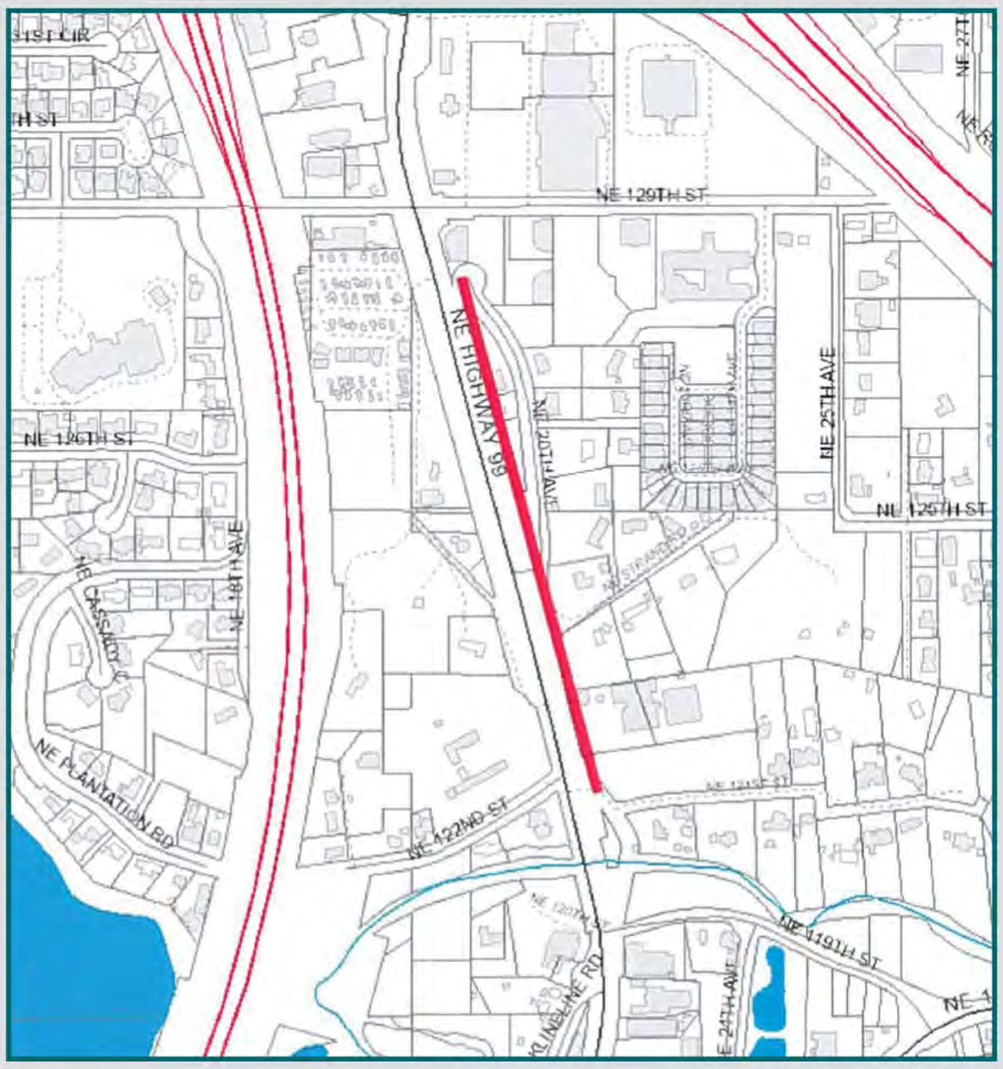
PROJECT

About 1,450 feet of concrete sidewalk will be built on the east side of Highway 99. This will eliminate a gap in the eastside sidewalk, from the Highway 99 bridge over Salmon Creek to Northeast 129th Street. The sidewalk will be at least 5 feet wide and 8 feet wide where right-of-way widths and topography allows.

A bicycle lane will be built alongside Highway 99, with a 2- to 3-foot-wide painted buffer between the bicycle lane and vehicle lanes. Vehicle-lane widths on Highway 99 will be narrowed slightly for about 500 feet, beginning at the bridge over Salmon Creek, to provide room for this visual buffer.

This project will improve mobility and safety, especially for area residents who walk or cycle to grocery stores and other shopping on the Highway 99 corridor, and connect to sidewalks in the Sherwood neighborhood and other residential areas to the east. Benches and landscaping also will be incorporated into the project.

Portions of the sidewalk will use pervious concrete so water can drain through the pavement. Pervious concrete is part of low impact development, which manages rainfall at its source without the need for large treatment facilities.



SCHEDULE AND TRAFFIC

Construction is scheduled to begin in late summer 2018 and take about 15 weeks, with completion expected in early 2019. Construction will be done off the east side of Highway 99. There will be single-lane closures, but the overall traffic impact should be minimal.

FUNDING

Construction is expected to cost an estimated $541,500.

Clark County will receive two grants to help pay for construction: a $345,000 grant from the Washington State Department of Transportation's Pedestrian and Bicycle Program; and a $150,000 grant from the Washington State Transportation Improvement Board.

The remainder of construction dollars will come from the County Road Fund.
