

Active Managerial Control & Certified Manager

The person in charge (PIC) of a food establishment must demonstrate Active Managerial Control (AMC) and ensure all food workers routinely follow safe food handling practices to reduce the risk of foodborne illness. A PIC with AMC ensures food employees are trained to safely complete their task, verifies procedures are properly completed, identifies and corrects food safety risks, and properly prepares for and responds to emergencies. Review your inspection reports, third-party audits, internal observations, and this document to help determine your level of Active Managerial Control.

While every PIC must maintain AMC, most establishments are also required to have at least one employee with a Certified Food Protection Manager (CFPM) certificate (WAC 246-215-02107). The CFPM does not need to be on premises but is expected to have a key role in ensuring food safety. The CFPM must make sure persons in charge are properly trained, procedures are developed, and food safety requirements are understood and followed. If able to ensure requirements are met, a person may be the CFPM for multiple establishments, such as at a restaurant or store with several locations.

Note: Use this document to help your establishment maintain AMC. Be sure to work with your local health jurisdiction for any additional information or approvals as needed.

Section 1: Food Establishment Information						
Establishment Name		Phone				
Contact Name		Title / Position				
Section 2: Common Procedures that Apply to Food Establishments						
Are you confident your staff complete these processes following proper food safety procedures? If not, it's time to determine your policy, develop a procedure, and train or retrain staff.						
Health & Hygiene	Temperature Control		Contamination Prevention			
Handwashing	☐ Using a Thermometer	☐ Cold Holding	☐ Produce Washing			
Utensil Use	☐ Cooking	☐ Thawing	☐ Raw Meat Separation			
☐ Illness Symptoms	☐ Hot Holding	☐ Receiving Food	☐ Cleaning & Sanitizing			
☐ Illness Reporting	☐ Cooling	☐ Date Marking	☐ Allergen Awareness			
Section 3: Required Written Procedures						
While most policies and procedures may be verbal, the following procedures must be written and approved if conducted by the establishment. Note: All food establishments must have a written vomit and diarrhea clean-up plan.						
Processes Requiring Written Procedures		Complex Processes Requiring Variance or HACCP Plan				
 Vomit and diarrhea clean-up plan 		Packaging juice				
Refilling reusable containers		 Food preservation (such as curing, smoking, or acidifying) 				
 Allowing pet dogs in outdoor areas 		 Reduced oxygen/vacuum packaging 				
 Noncontinuous or unattended cooking 		 Molluscan shellfish life support tank 				
 Bare Hand Contact – Alternate procedure with written ill 		Custom processing of animals				
employee policy		Sprouting seeds or beans				
Time as a Public Health Co		Unique food handling, such as fermentation ified Food Protection Manager Requirement				

Food establishments with a low risk of foodborne illness due to limited food handling, low volume of food handled, and population served are encouraged, but not required, to have a Certified Food Protection Manager.

Establishments considered low risk and exempt from the CFPM requirement include the following operations:

- Serve or sell only pre-packaged foods, including cold holding TCS foods such as gallons of milk
- Prepare non-TCS foods, such as making cinnamon rolls, candy, doughnuts, pretzels, or blended syrup drinks
- Heat only commercially-processed, ready-to-eat foods, including lattes and hot holding TCS foods such as hot dogs
- · Serve food on an infrequent, temporary basis at short-term events, such as fairs and festivals

These establishments traditionally include convenience stores, movie theaters, hot dog carts, coffee kiosks, cinnamon roll and pretzel stands, ice cream shops, and temporary food booths.

All other establishments must have at least one employee with a valid, nationally accredited CFPM certificate. These establishments prepare raw animal products, wash raw produce, cool time/temperature control for safety (TCS) foods, use specialized processes, operate a facility that serves a highly susceptible population, or have other increased potential risk of foodborne illness.

Active Managerial Control & Certified Manager

Section 5: Duties of the Certified Food Protection Manager							
	Have a valid certificate from an accredited program (see below). CFPM certificates are valid for 5 years. The CFPM certificate is different than the Washington State Food Worker Card which is required for all food workers.						
	Ensure required procedures and plans (such as for vomit and diarrhea clean-up) are current and implemented.						
	 Ensure each person in charge is trained and has the knowledge required in WAC 246-215-02105, such as: Understand the causes and prevention of foodborne illness Understand cross contamination prevention, proper sanitation, and control of food allergens Know required food safety temperatures for receiving, storage, cooking, and cooling Know how to respond to emergencies, imminent health hazards, or reports of foodborne illness 						
	 Ensure each person in charge can maintain Active Managerial Control required in WAC 246-215-02115, such as: Food workers are properly trained and following food safety requirements for their tasks Food workers only work when healthy, properly wash hands, and prevent bare hand contact with food Food workers monitor food temperatures and ensure foods are cooked and cooled correctly Food is from approved sources and stored correctly to prevent contamination

Section 7: Certified Food Protection Manager Maintenance							
	Ensure at least one employee has a current CFPM certificate. Renew certificate every five years.						
	Make sure CFPM monitors procedures and staff training to maintain food safety requirements.						
	Have copy of CFPM certificate available. Replace CFPM within 60 days if certified employee leaves employment.
